										Total Q20 Flow =	

The formula used to compute the discharge, Q in gpm from these measurements is:

$$Q = 29.83cd^2(p)^{1/2}$$

where

c = is the coefficient of discharge

d = the diameter of the outlet in inches

p = the velocity pressure in psi.

If flow tubes (stream straighteners) are being utilized a "c" of 0.95 is suggested unless the coefficient of the tube is known.

Outlet square and projecting into barrel

c = 0.70

Outlet square and sharp

c = 0.80

Outlet smooth and rounded

c = 0.90

The formula which is generally used to compute the discharge at the specified residual pressure or for any desired pressure drop is:

$$Q_r = Q_f \times \frac{H_r^{0.54}}{H_f^{0.54}}$$

Q<sub>r</sub> = flow available at desired residual pressure

Q<sub>f</sub> = flow during test

H<sub>r</sub> = pressure drop to desired residual pressure

H<sub>f</sub> = pressure drop during test

## INSTRUCTION FOR SUBMITTING INSURANCE CERTIFICATES AND ENDORSEMENT FORMS

### *Certificates of Insurance*

The sample accord form on the following page is provided to facilitate your preparation and submission of certificates of insurance. You may use this or any industry form that shows coverage as broad as that shown on the attached sample. **Please note the certificate holder address must be as shown on the attached sample accord form with the contract number and insurance exhibit identification information completed.** Improperly addressed certificates may delay the contract start-up date because the City's practice is to return unidentifiable insurance certificates to the insured for clarification as to the contract number. **Cancellation provisions must be endorsed to the policy. Modifying the certificate does not change coverage or obligate the carrier to provide notice of cancellation.**

### *Endorsement Forms*

Original endorsements are required for commercial general liability and business automobile liability insurance policies and must be attached to the applicable certificate of insurance. City preference is that you use the endorsement forms which are attached. Substitute forms will be accepted, however, as long as they include provisions comparable to the attached.
