Subject: Phase I Environmental Site Assessment, 2151 Lockwood Street, Oxnard, California

Dear Mr. Ross:

This report presents the findings of a Phase I Environmental Site Assessment (ESA) completed by Rincon Consultants, Inc. (Rincon) for the property located at 2151 Lockwood Street in Oxnard, California. The Phase I ESA was performed in accordance with our proposal dated October 10, 2022, and contract dated October 10, 2022.

The accompanying report presents our findings and provides an opinion regarding the presence of recognized environmental conditions in connection with the subject property. Our work program for this project, as referenced in our contract, is intended to meet the guidelines outlined in the American Society for Testing and Materials (ASTM), Standard Practice for Environmental Site Assessments: *Phase I Environmental Site Assessment Process* (ASTM Standard E1527-13 and E1527-21). Our scope of services, pursuant to ASTM practice, did not include any inquiries with respect to asbestos-containing building materials unrelated to releases into the environment; biological agents; cultural and historic resources; ecological resources; endangered species; health and safety; indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment; industrial hygiene; lead-based paint unrelated to releases into the environment; lead in drinking water; mold or microbial growth conditions; polychlorinated biphenyl-containing building materials (e.g., interior fluorescent light ballasts, paint, and caulk); naturally-occurring radon; regulatory compliance; substances not defined as hazardous substances (including some substances sometimes generally referred to as emerging contaminants) unless or until such substances are classified as a Comprehensive Environmental Response, Compensation, and Liability Act hazardous substance; and wetlands.

Thank you for selecting Rincon for this project. If you have any questions, or if we can be of any future assistance, please contact us.

Sincerely,
Rincon Consultants, Inc.

Lisa Bestard
Senior Environmental Scientist

Ryan Thacher, PhD, PE
Director of Site Assessment and Remediation

Executive Summary

This report presents the findings of a Phase I Environmental Site Assessment (ESA) for the property located at 2151 Lockwood Street in Oxnard, California (subject property). The Phase I ESA was performed for SVM-Lockwood, LLC (SVM) by Rincon Consultants, Inc. (Rincon). SVM has requested this assessment and will use the information for the purpose of the sale and redevelopment of the subject property for commercial use. The subject property is currently vacant land. It is our understanding that the proposed future use of the property includes the development a commercial retail center.

The subject property is located in an area that is primarily composed of commercial and light industrial land uses. Properties in the vicinity of the subject property include retail stores, restaurants, offices, and a flooring warehouse.

During the completion of this Phase I ESA, Rincon performed a site reconnaissance and interviews with the User of the report (SVM), and the owner of the subject property (SVM). In addition, Rincon reviewed potential vapor migration sources, online agency records, and historical records, including aerial photographs, topographic maps, city directories, fire insurance maps, and building permits. Also, SVM provided four documents for our review: a previous Phase I ESA from Rincon, a Phase I and II ESA from Stantec, a Soil Assessment Report from Rincon, and a title report for the subject property.

Based on the findings of this Phase I ESA, it is our opinion that no recognized environmental conditions were identified for the subject property. However, notable Findings in connection with the subject property are as follows:

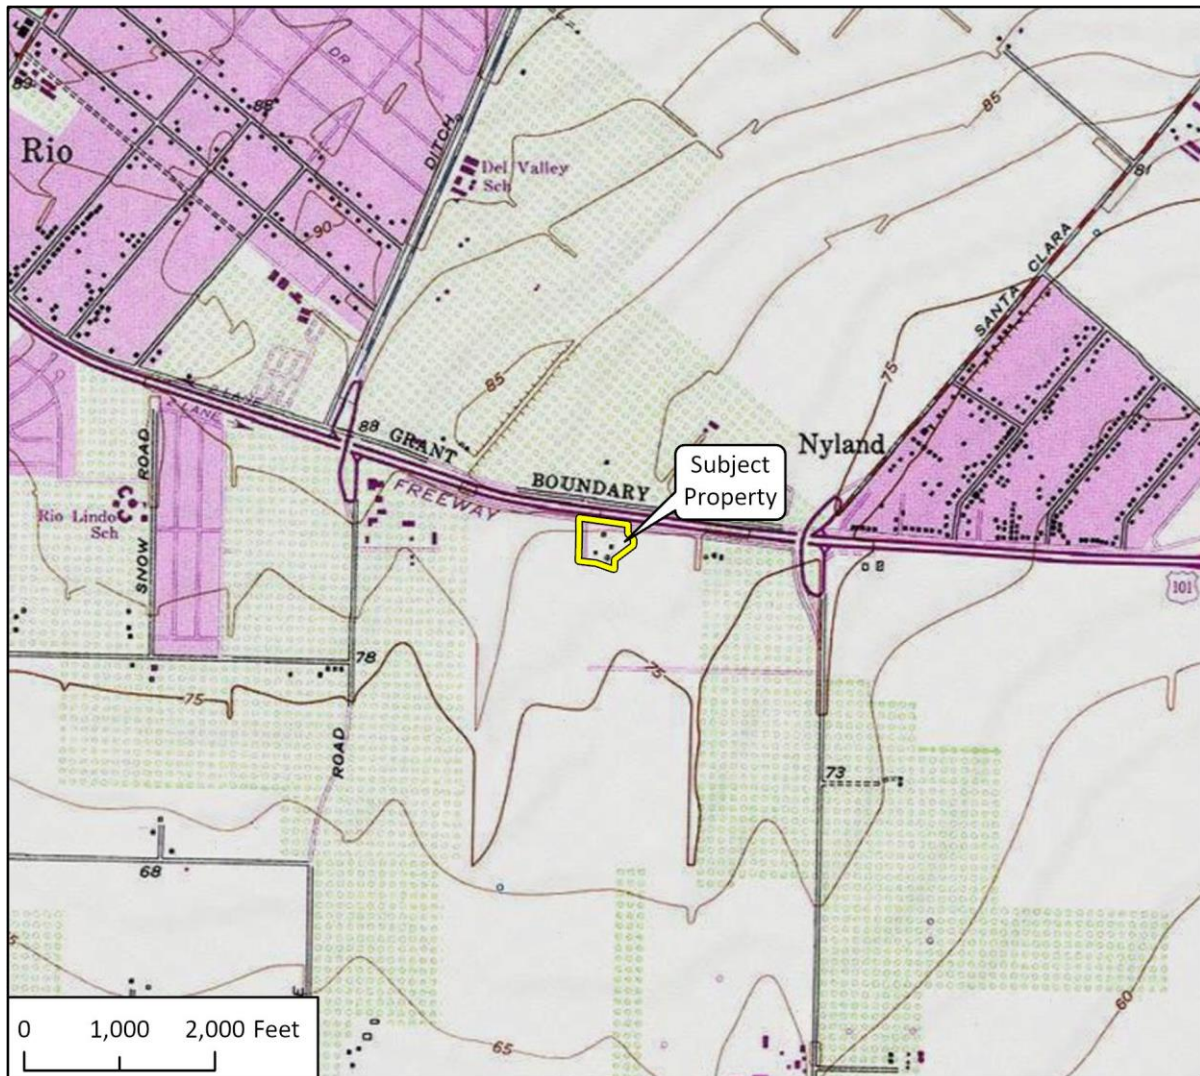

Notable Findings

1. Northern adjacent gasoline station (2005-2019) and former automotive repair (1980-1996) – 2001 Ventura Boulevard
2. Northern adjacent gasoline station (1961) – 2099 Ventura Boulevard

Because we have no evidence indicating that the subject property has been impacted by hazardous materials or petroleum products, no additional assessment is recommended.

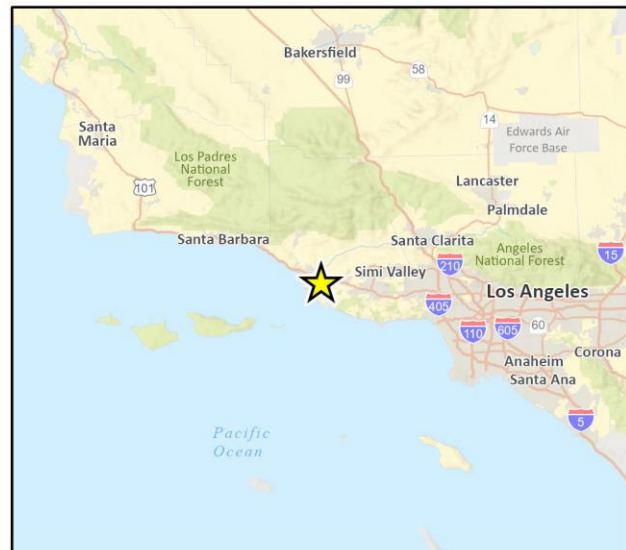

1 Introduction

This report presents the findings of a Phase I Environmental Site Assessment (ESA) conducted for the property located at 2151 Lockwood Street in Oxnard, California (subject property; Figure 1). The Phase I ESA was performed by Rincon Consultants, Inc. (Rincon) for SVM-Lockwood, LLC (SVM) in general conformance with American Society for Testing and Materials (ASTM) E1527-13 and E1527-21, our proposal dated October 10, and our contract dated October 10, 2022. The following sections present our findings and provide our opinion as to the presence of recognized environmental conditions (RECs) on the subject property.

Figure 1 Vicinity

Imagery provided by National Geographic Society, Esri and its licensors © 2022. The topographic representation depicted in this map may not portray all of the features currently found in the vicinity today and/or features depicted in this map may have changed since the original topographic map was assembled.

 Subject Property

1.1 Purpose and Definitions

SVM has requested this assessment and will use the information for the purpose of the sale and redevelopment of the subject property for commercial use. The purpose of this Phase I ESA was to determine if there are RECs on the subject property, taking into account commonly and reasonably ascertainable information, and to qualify for Landowner Liability Protections under the Brownfields Amendments to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

Recognized Environmental Condition (REC)

A REC is defined pursuant to ASTM E1527-21 as,

- “(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment;
- (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or
- (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment”.

As stated in ASTM E1527-21,

“likely is that which is neither certain nor proved, but can be expected or believed by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinions given therein”.

Controlled REC

A Controlled REC is defined pursuant to ASTM E1527-21 as,

“recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)”.

Historical REC

A Historical REC is defined pursuant to ASTM E1527-21 as,

“a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition”.

De minimis

A *de minimis* condition is defined pursuant to ASTM E1527-21 as,

“a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition”.

Property Use Limitation

A Property Use Limitation (PUL) is defined pursuant to ASTM E1527-21 as,

“a limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allows hazardous substances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria”.

Significant Data Gap

A Significant Data Gap is defined pursuant to ASTM E1527-21 as,

“a data gap that affects the ability of the environmental professional to identify a recognized environmental condition”.

Notable Finding

Although not defined by ASTM E1527-13 or E1527-21, Rincon utilizes the term *Notable Finding* for potential environmental concerns present at or possibly present at a property that do not specifically fit one of the above ASTM-defined situations, yet may impact current or future use of the subject property.

1.2 Scope of Services

The scope of services conducted during this study is outlined below:

- Performed a reconnaissance of the subject property to identify obvious indicators of the existence of hazardous materials.
- Observed adjacent or nearby properties from public thoroughfares in an attempt to see if such properties are likely to use, store, generate, or dispose of hazardous materials.
- Obtained and reviewed an environmental records database search to obtain information about the potential for hazardous materials to exist at the subject property or at properties located in the vicinity of the subject property.
- Reviewed files for the subject property and immediately adjacent properties as identified in the database report, as applicable.
- Reviewed the current United States Geological Survey (USGS) topographic map to obtain information about the subject property and regional topography and uses of the subject property and surrounding sites.
- Reviewed additional pertinent record sources (e.g., California Geologic Energy Management Division [CalGEM] records, online databases of hazardous substance release sites), as necessary, to identify the presence of RECs at the subject property.

- Reviewed the California State Water Resources Control Board (SWRCB) Statewide Per- and Polyfluoroalkyl Substances (PFAS) Investigation online Public Map Viewer regarding current PFAS orders issued to facilities located in the vicinity of the subject property.
- Reviewed reasonably ascertainable historical resources (e.g., aerial photographs, topographic maps, fire insurance maps, city directories) to assess the historical land use of the subject property and adjacent properties.
- Provided a user interview questionnaire to a representative of SVM, the user of the Phase I ESA.
- Provided a property owner interview questionnaire to the property owner or a designated subject property representative identified to Rincon by SVM
- Conducted interviews with other property representatives (e.g., key site manager, occupants), as applicable.
- Reviewed available SVM-provided information (e.g., previous environmental reports, title documentation).
- Requested Title Search Information Reports from the User of the report.

1.3 Significant Assumptions, Limitations, Deviations, Exceptions, Special Terms, and Conditions

This work is intended to adhere to good commercial, customary, and generally accepted environmental investigation practices for similar investigations conducted at this time and in this geographic area. No guarantee or warranties, expressed or implied, are provided. The findings and opinions conveyed in this report are based on findings derived from a site reconnaissance, review of an environmental database report, specified regulatory records and historical sources, and comments made by interviewees. This report is not intended as a comprehensive site characterization and should not be construed as such. Standard data sources relied upon during the completion of Phase I ESAs may vary with regard to accuracy and completeness. Although Rincon believes the data sources are reasonably reliable, Rincon cannot and does not guarantee the authenticity or reliability of the data sources it has used. Additionally, pursuant to our contract, the data sources reviewed included only those that are practically reviewable without the need for extraordinary research.

Rincon has not found evidence that hazardous materials or petroleum products exist at the subject property at levels likely to warrant mitigation. Rincon does not under any circumstances warrant or guarantee that not finding evidence of hazardous materials or petroleum products means that hazardous materials or petroleum products do not exist on the subject property. Additional research, including surface or subsurface sampling and analysis, can reduce SVM's risks, but no techniques commonly employed can eliminate these risks altogether.

In addition, pursuant to ASTM E1527-13 and E1527-21 practice, our scope of services did not include any inquiries with respect to asbestos-containing building materials unrelated to releases into the environment; biological agents; cultural and historic resources; ecological resources; endangered species; health and safety; indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment; industrial hygiene; lead-based paint unrelated to releases into the environment; lead in drinking water; mold or microbial growth conditions; polychlorinated biphenyl (PCB)-containing building materials (e.g., interior fluorescent light ballasts, paint, and caulk); naturally-occurring radon; regulatory compliance; substances not defined as hazardous substances (including some substances sometimes generally referred to as emerging

contaminants) unless or until such substances are classified as a CERCLA hazardous substance; and wetlands.

1.4 ASTM Deviations

Deviations from ASTM E1527-13 and E1527-21 practice were not encountered during the completion of this Phase I ESA.

1.5 User Reliance

SVM has requested this assessment and will use the information for the purpose of sale and redevelopment of the subject property for commercial use. This Phase I ESA was prepared for use solely and exclusively by SVM, Canfield Development, and Sunbelt Enterprises, LLC. No other use or disclosure is intended or authorized by Rincon. Also, this report is issued with the understanding that it is to be used only in its entirety. It is intended for use only by SVM, Canfield Development, and Sunbelt Enterprises, LLC, and no other person or entity may rely upon the report without the express written consent of Rincon.

1.6 Site Description

Location

The subject property is a 4.7-acre parcel located north of Lockwood Street, west of Outlet Center Drive, and south of Ventura Freeway and Ventura Boulevard in Oxnard, California (Figure 2). The property is identified as 2151 Lockwood Street and APN 213-0-090-275.

Subject Property and Vicinity General Characteristics

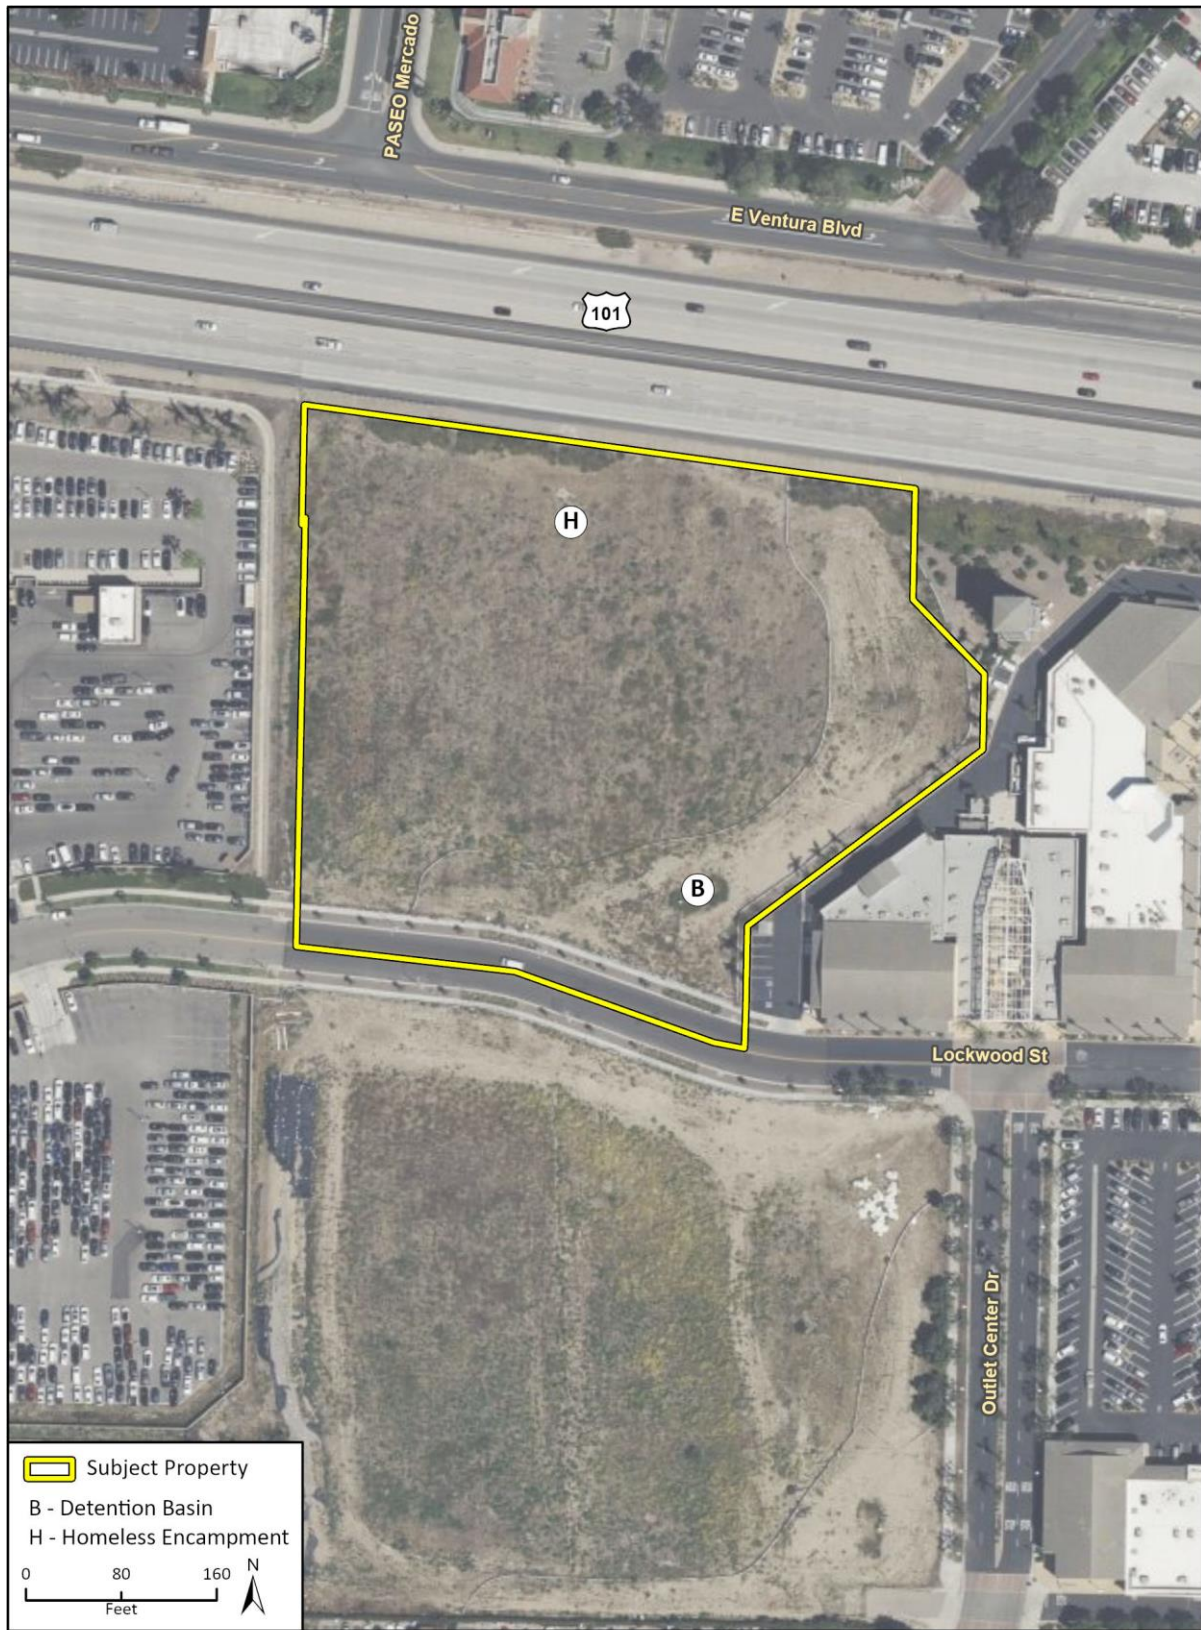

Lockwood Street is located along the southern end of the subject property, which is currently vacant land.

The subject property is located in an area that is primarily composed of commercial and light industrial land uses. Properties in the vicinity of the subject property include retail stores, restaurants, offices, and a flooring warehouse. The current adjacent land uses are described in Table 1 and depicted on Figure 3.

Table 1 Current Uses of Adjacent Properties

Area	Use
Northern Properties	Ventura Freeway followed by Ventura Boulevard and Burger King (2800 Paseo Mercado), a commercial property and parking lot (2801 Paseo Mercado) and a Costco/Costco Gasoline (2001 Ventura Boulevard), and an additional commercial property (2101 Ventura Boulevard)
Eastern Properties	Outlet Center Drive followed by California Lutheran University (2201 Outlet Center Drive) and several commercial stores, restaurants, and offices (2200 Outlet Center Drive, Units 390-450) and an associated parking lot
Southern Properties	Southern portion of Lockwood Street followed by vacant land
Western Properties	CarMax used car dealership and associated parking lots (2000-2001 Lockwood St.).

Figure 3 Adjacent Land Use

Imagery provided by Microsoft Bing and its licensors © 2022.

ESA Phase I Figures 1-3
PhiFig 3 Adj Land Use Map

Descriptions of Structures, Roads, and Other Improvements on the Subject Property

The southern portion of Lockwood Street is located to the south of the subject property. Additionally, a chain-link fence was noted around the perimeter of the subject property. During the site reconnaissance, no structures, or other improvements were observed on the subject property. Access to the subject property is available from Lockwood Street.

The following utility providers service the subject property area:

- Electrical Service – Southern California Edison
- Natural Gas Service – Southern California Gas Company
- Water Service – City of Oxnard
- Sewer Service – City of Oxnard
- Solid Waste Service – City of Oxnard

2 User-Provided Information and Responsibilities

2.1 Review Land Title Records and Judicial Records for Environmental Liens and Activity and Use Limitations

Rincon requested title search information reports from the User of the report. Pursuant to ASTM E1527-21,

“the title search information reports shall identify environmental covenants, environmental easements, land use covenant and agreements, declaration of environmental land use restrictions, environmental land use controls, environmental use controls, environmental liens, or any other recorded instrument that restricts, affects, or encumbers the title to the subject property due to restrictions or encumbrances associated with the presence of hazardous substances or petroleum products. Title search information reports shall review land title records for documents recorded between 1980 and the present. If judicial records are not reviewed, the title search information report shall include a statement providing that the law or custom in the jurisdiction at issue does not require a search for judicial records in order to identify environmental liens”.

As stated in ASTM E1527-21 it is the “user’s responsibility to search for environmental liens and activity and land use limitations (AULs)”. This is in “addition to the environmental professional’s search of institutional control and engineering control registries described in” ASTM E1527-21 Section 8.2.

A copy of the title search information records provided by the User is included in Appendix A. Based on our review of the title search information records:

- The title to the subject property is vested in Sunbelt Enterprises, LLC.
- A May 24, 1991 Restrictive Covenant that declares every lot within the subject property must retain a quantity of storm water runoff.
- A January 1, 2022 Restrictive Covenant Modification for the subject property declares homeowners can request to modify property documents that contain unlawful discriminatory covenants.
- A May 19, 2020 Covenant and Deed Restriction declares the property owner is required to minimize pollutants in urban runoff and maintain storm water quality control measures exhibited.
- Eight easements are listed as located on the subject property for ingress, egress, and public utilities. A map of the easements are included in appendix D

2.2 User Questionnaire

As described in ASTM E1527-13 Section 6 and E1527-21 Section 6, a User Questionnaire as provided by ASTM E1527-13 Appendix X3 and E1527-21 Appendix X3 was provided to SVM Development, LLC.

The purpose of the User Questionnaire is for the User of the Phase I ESA to provide actual knowledge pertaining to the subject property to help identify RECs. Mark Ross, Manager with SVM, completed the User Questionnaire on October 24, 2022. A copy of the completed questionnaire is included as Appendix A.

Based on our review of the completed questionnaire, the user indicated the following:

- The Phase I ESA is required/being performed for the sale and development of the subject property.
- A sale transaction is planned for the subject property.
- Specialized knowledge from the sale of and work performed on adjacent parcels site.
- A prior environmental report prepared by Rincon is available for the subject property.

Based on our review of the completed questionnaire, the user *did not review* the following sources of information and is unaware of information regarding the following:

- Recorded land title records (or judicial records, where appropriate) that identify any environmental liens filed or recorded against the subject property
- Recorded land title records (or judicial records, where appropriate) that identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the subject property under federal, tribal, state, or local law
- Title Report that identifies information pertaining to environmental cleanup liens or AULs for the subject property

Based on our review of the completed questionnaire, the user is unaware of information regarding the following:

- Reduction in value for the subject property relative to any known environmental issues
- Commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases
- Obvious indicators that point to the presence or likely presence of releases at the subject property
- Pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the subject property
- Pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property
- Notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products

Based on our review of the completed questionnaire, the user identified information pertaining to the subject property that may help identify RECs in connection with the subject property. This information is summarized below:

- A previous environmental report prepared by Rincon is available for the subject property

The following documents regarding the subject property were provided by SVM:

- *Phase I ESA, Rincon Consultants Inc., July 2014.* Based on our review of this report, one REC was identified in connection with the subject property relating to the historical agricultural use of the subject property.
- *Phase I and Phase II ESA, Stantec, December 2020.* Based on our review of this report, no RECs were identified in connection with the subject property. Additionally, Stantec advanced a total of six shallow borings at the subject property and southern adjacent property and tested soil for organochlorides pesticides (OCPs) by United States Environmental Protection Agency (EPA) test method 8081A and heavy metals arsenic and lead by US EPA test method 6010B. OCPs were detected in four of the six samples analyzed, however all detectable concentrations were below EPA and Department of Toxic Substances Control (DTSC) residential screening levels. Lead was detected in all six soil samples at concentration below the most conservative DTSC screening levels. Additionally, arsenic was detected in all soil samples above EPA Regional Screening Levels (RSLs) for residential use, which Stantec noted falls within typical southern California naturally-occurring regional background levels. Based on these results Stantec determined that the historical agricultural use of the subject property is not a REC.
- *Soil Assessment Report, Rincon Consultants Inc., 2021.* On December 29, 2020 Rincon advanced a total of eight soil borings to a depth of 3 feet at the subject property and southern adjacent property. Rincon found that concentrations of OCPs in shallow soil were below both the residential, commercial, and construction worker exposure Environmental Screening Levels (ESLs) established by the San Francisco Bay Regional Water Quality Control Board. Additionally, Rincon found that although arsenic was detected in the shallow soil at concentrations which exceeded ESLs, the concentrations reported were within the accepted California background concentration range published by the Kearney Foundation. Based on these results no further assessment is warranted.
- *Preliminary Title Report, Fidelity National Title Company, 2022.* Based on our review of this report, several land use covenants were identified. Further information on the land use covenants is provided in Section 2.2.

2.3 User-Provided Information of Concern

Based on the information obtained during our review of user-provided documents, no hazardous material conditions with the potential to impact the subject property were identified.

3 Records Review

3.1 Physical Setting Sources

Topography

The current USGS topographic map (Oxnard and Camarillo Quadrangle) indicates that the subject property is situated at an elevation of approximately 82 feet above mean sea level with topography sloping down to the southwest. The adjacent topography consists of relatively flat land. A copy of the current USGS topographic map is included in Appendix B (Environmental Data Resources [EDR] 2022).

Geology and Hydrogeology

Based on information provided by SVM and the property owners, there are no site-specific geotechnical or geologic reports available for the subject property.

According to the current USGS Geologic Map (Clahan, 2003), the subject property is underlain by Holocene alluvial deposits, which are described as deposited as overbank material and composed of “unconsolidated, poorly sorted, clayey sand with some gravel.”

During the preparation of this Phase I ESA, we reviewed the California SWRCB’s online GeoTracker database to determine groundwater flow direction in the vicinity of the subject property. Groundwater is reported to be between 11 and 20 feet below ground surface and flows toward the northwest at a site located approximately 350 feet to the northeast of the subject property (Resource Management Agency County of Ventura, 2010).

3.2 Government Record Sources

Rincon outsourced with a regulatory database search contractor to obtain records of sites that generate, store, treat, or dispose of hazardous materials and sites for which a hazardous material release incident has occurred. The regulatory database search was conducted for the subject property and included data from surrounding sites within specified radii of the subject property. A copy of the database report, which specifies the ASTM E1527-13 and ASTM E1527-21 search distance for each public list, is included as Appendix B. As shown on the database report, federal, state, and county lists were reviewed as part of the research effort. Please refer to Appendix B for a complete listing of sites reported by EDR and a description of the databases reviewed.

The Map Findings Summary, included in the database report, provides a summary of the databases searched, the number of reported facilities within the search radii, and whether the facility is located on-site or adjacent to the subject property. The following information is based on our review of the Map Findings Summary and the information contained in the database report.

Subject Property

The subject property was listed on the following databases:

- NPDES, CIWQS, and CERS databases as Outlet Center at Lockwood Street

Regulatory agency files reviewed for the subject property are discussed in the Review of Agency Files section of this report.

Offsite Properties

Offsite properties listed in the database report fall under two general categories of databases: those reporting unauthorized releases of hazardous substances (e.g., Leaking Underground Storage Tank [LUST], National Priority List [a.k.a. Superfund sites], and corrective action facilities), and those reported as businesses permitted to use hazardous materials or generate hazardous wastes, for which an unauthorized release has not been reported to a regulatory agency.

Rincon reviewed the database maps and select detailed listings to evaluate their potential to impact the subject property, based on the following factors:

- Reported distance of the facility from the subject property;
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes;
- Reported case type (e.g., soil only, failed underground storage tank [UST] test only);
- Reported substance released (e.g., chlorinated solvents, gasoline, metals);
- Reported regulatory agency status (e.g., case closed, “no further action”); and,
- Location of the facility with respect to the reported groundwater flow direction (discussed in the Geology and Hydrogeology section of this report)

Facilities/properties that were interpreted by Rincon to be of potential environmental concern to the subject property, based on one or more of the factors listed above, are summarized in Table 2. In accordance with ASTM E1527-13 and E1527-21, contamination migration pathways in soil, groundwater, and soil vapor were considered in our analysis of offsite properties of potential environmental concern.

Orphan Listings

The database report identified three orphan or unmapped site listings, which were unable to be plotted due to insufficient address information. Based on Rincon’s review of the limited address information or site descriptions for the orphan listings, none of the listings have the potential to impact the subject property.

Table 2 Database Listing Summary of the Subject Property and Select Sites Within One-Eighth Mile of the Subject Property

Site Name	Database Site ID	Site Address	Distance from Subject Property	Database Reference	Comments
Subject Property					
Outlet Center	1	Lockwood Street	Subject Property	NPDES, CIWQS	The facility has an active stormwater construction permit status as of 2019.
				CERS	The facility is listed on the CalEPA Regulated Site Portal and is classified as construction storm water. No violations were found during the most recent compliance evaluation inspection in 2020.
Adjacent Properties					
Charter College	B3, B4	2000 Outlet Center Drive Suite 150	Adjacent Property – East (350 Feet)	RCRA NON GEN/NLR	The facility did not generate hazardous waste in 2019.
				CERS HAZ WASTE	The facility is classified as hazardous waste generator.
				HAZNET	The facility generated onsite and disposed offsite of various quantities of hazardous waste, including photochemical/photo processing waste and aged or surplus organics/inorganics in 2019 and 2021.
				MED WASTE VENTURA	The facility is classified as a small quantity medical waste generator.
				CERS	The facility is classified as a chemical storage facility and did not receive any violations during the most recent compliance evaluation inspection in 2022.
				HWTS	The facility is listed in the hazardous waste tracking system as a college, university, or professional school and is active as of 2019.
Costco Wholesale, Inc., Costco Wholesale #420	C6, C7, C8, C9	2001 East Ventura Boulevard	Adjacent Property – North	UST	The facility has at least one active UST.
				RCRA-SQG	The facility was classified as a small quantify generator of hazardous waste in 2021
				ENVIROSTOR	The facility is listed is having a Tiered Permit. No other pertinent information was provided.
				FINDS	The facility is enrolled in a state mandated program for hazardous waste.
				ECHO	The facility is listed as active with no compliance or enforcement violations identified.
				HAZNET	The facility generated onsite and disposed of offsite various quantities of hazardous waste, including organic solids, and pharmaceutical waste in

Site Name	Database Site ID	Site Address	Distance from Subject Property	Database Reference	Comments
					from 2005 to 2021
				MED WASTE VENTURA	The facility is classified as a small quantity generator of medical waste.
				CERS	The facility is listed in the United States (US) Environmental Protection Agency (EPA) Air Emission Inventory System (EIS) and has various environmental contracts. Additionally, the facility is classified as a chemical storage facility with no violations incurred during the most recent compliance evaluation inspection in 2020.
				HWTS	The facility is listed in the hazardous waste tracking system as a general merchandise store as of 2003.
				CERS HAZ WASTE	The facility is classified as a hazardous waste generator.
Former AutoNation USA, CARMAX #6014, Dent Wizard International	A11, A12, A13, A14, A15, A16	2001 Lockwood Street	Adjacent Property – West	AST	The facility has one 1,500-gallon AST and one 2,500-gallon AST.
				UST	The facility has at least on UST.
				CERS HAZ WASTE	The facility is classified as a hazardous waste generator.
				CERS TANKS	The facility is classified as having an AST and a UST.
				HAZNET	The facility generated onsite and disposed of offsite various quantities of hazardous waste, including organic solids, and oil/water separation sludge, and unspecified oil containing waste in 2001-2005, 2007, and 2009.
				CERS	The facility is classified as a chemical storage facility with no violations incurred during the most recent compliance evaluation inspection in 2021.
				HWTS	The facility is listed in the hazardous waste tracking system as a new car dealer from 2000 to 2009.
				RCRA NON GEN	The facility did not generate hazardous waste in 2018.
				RCRA SQG	The facility was classified as a small quantify generator of hazardous waste in 2012.

Site Name	Database Site ID	Site Address	Distance from Subject Property	Database Reference	Comments
Power Equipment Services, Oxnard Truck Center	D17, D18	2101 Ventura Boulevard	Adjacent Property -- Northeast	LUST, VENTURA CO. LUST, VENTURA CO BWT, CORTESE, HIST CORTESE	The facility formerly operated as a heavy equipment rental and service facility. USTs including a total of 6 waste oil storage, new oil storage, gasoline, and diesel tanks were present at two locations onsite and have since been removed from the site. A product piping failure in the diesel UST resulted in an undocumented release in 1987. Remediation at the site included excavation of impacted soils and treatment of groundwater. According to the Case Closure Summary prepared by the Ventura County Environmental Health Department "contaminated soil and groundwater are localized, not mobile, not volatile, and concentrations have been stable since at least 2006." Due to the shrinking of the overall plume size and stable concentrations of contaminants (total petroleum hydrocarbons) the case received case closure in in December 2009.
				CERS HAZ WASTE	The facility is classified as a hazardous waste generator.
				CERS	The facility is classified as a LUST Cleanup Site and a chemical storage facility with one violation incurred during the most recent compliance evaluation inspection in 2022 relating to administrative procedures to which the facility promptly returned to compliance.
				RCRA SQG	The facility was classified as a small quantity generator of hazardous waste in 1991.
				SWEEPS UST, HIST UST, CA FID UST	The facility had three 8,000-gallon motor vehicle fuel/waste oil and three 12,000-gallon diesel USTs.
				FINDS	The facility is enrolled in a state mandated program for hazardous waste.
				ECHO	The facility is listed as active with no compliance or enforcement violations identified.
Oxnard Berry Farms	D19	2105 Ventura Boulevard	Adjacent Property -- Northeast	HIST UST	The facility has one 500-gallon regular gasoline and two 280-gallon unleaded gasoline USTs.
Ben Franklin Superstore	H30	1889 East Ventura Boulevard	Adjacent Property -- Northwest	EDR HIST AUTO	The facility is listed as a historical gasoline station from 2001 to 2002.

2151 Lockwood Street, Oxnard, California
Phase I Environmental Site Assessment

Site Name	Database Site ID	Site Address	Distance from Subject Property	Database Reference	Comments
Crossgradient Release Sites (within 150 feet)					
SCE CORIX CROSSDOCK	A2	2000 Lockwood Avenue	Approximately 250 Feet – West	RCRA NON GEN/NLR	The facility did not generate hazardous waste in 2012.
Chevron #9-7423	C5	1860 Ventura	Address appears to be misplotted ¹	HIST CORTESE	The facility is listed on the historical Cortese list as 1860 Ventura
Vista Paint Cooperation	G24, G25	2100 Outlet Center Drive	Adjacent Property – Approximately 500 Feet East	RCRA NON GEN/NLR	The facility did not generate hazardous waste in 2009.
				CERS HAZ WASTE	The facility is classified as a hazardous waste generator.
				HAZNET	The facility generated onsite and disposed of offsite various quantities of hazardous waste, including organic solids, and fuel in 2011, 2012, and 2016.
				HWTS	The facility is listed in the hazardous waste tracking system as a building material dealer and is active as of 2009.
Teleflex Control Systems, Becton Dickson Lab	N64, N65	1950 Williams Drive	Approximately 350 Feet– Southwest	ENVIROSTOR	The facility is listed in DTSC’s Site Cleanup Program. From 1968 to 1986 the site operated as a manufacturing facility for medical products. In 1991 a yellow mustard like substance appeared on the basement walls and floors of the site. The substance was identified to be a chromate compound. Surfaces were scraped and seal with an epoxy resin. The blooms reappeared in 1998. A Site Reassessment was performed in 2010/2011 and in 2013 the DTSC changed the site status to “No Action Required” as per US EPA decision rationale.
				UST	The facility has at least one inactive UST.

***Bold** listings indicate a release database

Regulatory agency information reviewed for the listings in the table above are summarized in the Review of Agency Files section of this report.

¹ This property appears to be six miles to the east of the subject property.

3.3 Review of Agency Files

As a follow-up to the database search, Rincon reviewed regulatory information for the subject property and facilities within the specified search radii that were interpreted to have the potential to impact the subject property, based on one or more factors previously discussed (e.g., distance, open case status, upgradient location, soil vapor migration).

The following is a summary of our review of regulatory information obtained from online sources (e.g., SWRCB GeoTracker database, Department of Toxic Substances Control [DTSC] EnviroStor database, local fire department) and/or files requested from the applicable regulatory agency, as described below.

Subject Property

The subject property was listed in three non-release databases: NPDES, CIWQS, and CERS. These listings indicate that hazardous materials are handled and stored on-site; however, no releases have been reported. Therefore, there were no regulatory agency records available for the subject property from the databases searched.

Adjacent Properties

Seven adjacent properties were listed in databases searched. Three of these properties have the potential to impact the subject property:

Power Equipment Services/Oxnard Truck Center 2001 Ventura Boulevard

This property is located adjacent to the northeast of the subject property.

Databases:	LUST, VENTURA CO BWT, CORTESE, HIST CORTESE
Agency Lead:	Ventura County
Listing/Case Status:	Closed as of April 1, 2010
Soil Impacts/COCs:	Yes/TPH
Soil Vapor Impacts/COCs:	Unknown
Groundwater Impacts/COCs:	Yes/TPH
Groundwater Depth/Flow Direction	Between 11 and 20 feet below grade/northwest
Site Distance from Subject property:	280 feet northwest, across Ventura Freeway and Ventura Boulevard
Release Distance from Subject Property:	Approx. 600 feet northeast
Potential Impacts to Soil, Soil Vapor, or Groundwater at Subject Property:	Yes – See Table 5

Ben Franklin Superstore 1889 East Ventura Boulevard

This property is located 450 feet to the northwest of the subject property.

Databases:	Hist Auto Station
Agency Lead:	None

Listing/Case Status:	none
Soil Impacts/COCs:	Unknown
Soil Vapor Impacts/COCs:	Unknown
Groundwater Impacts/COCs:	Unknown
Groundwater Depth/Flow Direction	Unknown
Site Distance from Subject property:	450 feet northeast, across Ventura Freeway and Ventura Boulevard
Release Distance from Subject Property:	Unknown
Potential Impacts to Soil, Soil Vapor, or Groundwater at Subject Property:	Unknown – See Table 5

Nearby Release Sites

One nearby release site was listed in the databases searched. This property is located approximately 350 feet to the southwest of the subject property.

Teleflex Control Systems/Becton Dickson Lab 1950 Williams Drive

This property is located adjacent to the southwest of the subject property.

Databases:	ENVIROSTOR
Agency Lead:	DTSC
Listing/Case Status:	No action required as of 2013
Soil Impacts/COCs:	Unknown
Soil Vapor Impacts/COCs:	Unknown
Groundwater Impacts/COCs:	Unknown
Groundwater Depth/Flow Direction	Unknown
Site Distance from Subject property:	Approximately 350 feet southwest
Release Distance from Subject Property:	Approx. 600 feet southwest
Potential Impacts to Soil, Soil Vapor, or Groundwater at Subject Property:	Unknown – See Table 5

3.4 Review of State of California Geologic Energy Management Division (CalGEM) Records

A review of the CalGEM Online Mapping System indicates that no oil wells are located on the subject property or within 0.25 mile of the subject property (CalGEM 2022). However, there is one oil and gas well located adjacent to the north across Ventura Freeway and Ventura Boulevard to the subject property:

- API 0411105772, a plugged dry hole well operated by Shell Western E&P Inc.

3.5 Review of National Pipeline Mapping System Records

A review of the National Pipeline Mapping System (NPMS) online Public Map Viewer indicates that no natural gas transmission pipelines or hazardous liquid pipelines are located on the subject property or adjacent properties. Additionally, no pipeline-related accidents or incidents are mapped within 0.25 mile of the subject property (United States Department of Transportation 2022).

3.6 Review of California Statewide PFAS Investigation

Beginning in 2019, the SWRCB sent assessment requirements to property owners of sites that may be potential sources of PFAS. These sites currently include select airports, chrome plating facilities, Department of Defense (DoD) sites, landfills, publicly owned treatment works facilities, and bulk fuel storage terminals and refineries. According to the SWRCB, “PFAS are a large group of human-made substances that do not occur naturally in the environment and are resistant to heat, water, and oil” (SWRCB 2022).

Our Month October 19, 2022 review of the California Statewide PFAS Investigation online Public Map Viewer indicates that there are no current airport, chrome plating, DoD, landfill, or publicly owned treatment works facilities with PFAS orders listed as located within 0.5 mile of the subject property (SWRCB 2022). Based on our review of the SWRCB’s March 12, 2021 Bulk Fuel Terminal/Refinery Investigative Order, the subject property is not listed on the Bulk Fuel Storage Terminals and Refineries List (Attachment 1 of the Order). In addition, none of the Bulk Fuel Storage Terminals or Refineries on the list are located within 0.5 mile of the subject property (SWRCB 2021).

Our October 19, 2022 review of the California Statewide Drinking Water System Quarterly Testing Results online Public Map Viewer indicates that perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) were not detected in Vineyard Ave Estates MWC (Oxnard) drinking water wells located approximately 0.7 miles to the southeast of the subject property and tested quarterly as part of a PFAS investigative order (SWRCB 2022).

3.7 Records Review Information of Concern

Based on the information obtained during our records review documented above, the following conditions have the potential to impact the subject property:

Adjacent Properties

- 2001 Ventura Boulevard – LUST release site, soil and groundwater impacts
- 1889 East Ventura Boulevard – former gasoline station (2001-2002), unknown soil and groundwater impacts

4 Historical Records

The historical records review completed for this Phase I ESA includes aerial photographs, topographic maps, fire insurance maps, city directories, and building permits as detailed in the following sections. Copies of the historical resources reviewed are included in Appendix C. Table 3 provides a summary of the historical use information available for the subject property and adjacent properties.

4.1 Methodology

Review of Aerial Photographs

Aerial photographs from EDR's aerial photograph collection were obtained. In addition, a current aerial photograph from Google Earth was reviewed. The aerial photographs were reviewed on October 25, 2022.

Review of Historical Topographic Maps

Historical topographic maps from EDR's. The historical topographic maps were reviewed on January October 25, 2022.

Review of City Directory Listings

EDR was contracted to provide copies of city directory listings for the subject property. The city directory listings were reviewed on October 28, 2022.

Review of Fire Insurance Maps

As indicated in the attached report, fire insurance maps were not available for the subject property or adjacent properties.

Review of City of Oxnard Building Permit Records

Based on the sufficient amount of information obtained from the above sources, building permit records were not reviewed.

Other Historical Sources

A recent aerial photograph was taken from Google Earth.

4.2 Summary of Subject Property and Adjacent Historical Uses

Table 3 Historical Use of the Subject Property and Adjoining Properties

Year	Source	Subject Property Use	Adjoining Property Use
1904	Topographic Map (TM)	Undeveloped land	North (N): A primary highway trending east-west (Ventura Freeway) followed by undeveloped land East (E): Undeveloped land South (S): Undeveloped land and one structure West (W): A road followed by undeveloped land

***Bold** listings indicate land uses with the potential to impact the subject property

4.3 Gaps in Historical Sources

Several gaps of greater than five years were identified in the historical records reviewed, from 1904 to 1927, 1927 to 1938, 1953 to 1959, 1961 to 1967, and from 1986 to 1993. These gaps are considered insignificant because the subject property use appears to be similar prior to and following the gaps.

4.4 Historical Use Information of Concern

Based on Table 3 above, the following historical uses of the subject property have the potential to impact the subject property:

- Agricultural land (dry farming/grazing/row crops/orchard): 1927-1985

Based on Table 3 above, the following historical uses of the (northern) adjacent property has the potential to impact the subject property:

- Gasoline Station: 2005-2019 (2001 Ventura Blvd.)
- Automotive repair: 1980-1996 (2001 East Ventura Blvd.)
- Gasoline Station: 1961 (2099 East Ventura Blvd.)

5 Interviews

Rincon performed interviews regarding the subject property and surrounding areas. The purpose of the interviews was to discuss current and historical conditions and to obtain information indicating the presence of RECs in connection with the subject property.

5.1 Interview Summary

Interview with Owner

An interview questionnaire was provided to the key site manager, Mark Ross, prior to the site reconnaissance. Mark Ross of SVM completed the Owner Questionnaire on October 24, 2022. A copy of the completed questionnaire is included in Appendix A. The following information is based on our review of the completed questionnaire with the property owner.

The property owner indicated the following:

- The subject property is currently in use as unimproved land.
- The subject property was formerly used for agricultural purposes.
- Northern adjoining properties include a freeway.
- Eastern adjoining properties include a retail center.
- Southern adjoining properties include an office.
- Western adjoining properties include Carmax.
- Sunbelt Enterprises, LLC obtained ownership of the subject property in 2004.
- The former owner of the subject property is unknown.
- A previous environmental assessment has been completed for the subject property by Rincon.
- A soil report from Geolabs is available for the subject property.
- A title report (PTR 10-2022) is available for the subject property.
- Pesticides or herbicides may be present at the subject property.
- There are no hazardous materials or petroleum products stored or used on the subject property.
- No hazardous wastes are generated at the subject property.

The property owner indicated that he is unaware of the presence of industrial drums, storage tanks (above or below ground), fill dirt, pits, ponds, lagoons, sumps, clarifiers, solvent degreasers, stained soil, vent pipes, fill pipes, or access ways, stained surfaces, private wells, non-public water systems, transformers, capacitors, or hydraulic equipment, records indicating the presence of polychlorinated biphenyls at the subject property. However the property owner indicated that he is aware of the presence of pesticides or herbicides from a previous report prepared by Rincon.

The property owner indicated that he is not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property. In addition, he is not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the subject property.

Interview with Site Manager

An interview questionnaire was provided to the site contact and key site manager, Mark Ross. Who completed the questionnaire on October 24, 2022.

Interviews with Occupants

Because the subject property is currently vacant, no occupants were interviewed as part of this research effort.

Interviews with Local Government Officials

Based on the sufficient information obtained from various sources, no local government officials were interviewed as part of this Phase I ESA.

Interviews with Others

Rincon did not attempt to interview neighboring property owners or others as part of this Phase I ESA.

5.2 Interview Information of Concern

Based on the information obtained during interviews, the following concerns have the potential to impact the subject property:

- Potential presence of pesticides or herbicides at the subject property

6 Site Reconnaissance

Rincon performed a reconnaissance of the subject property on November 1, 2022. The purpose of the reconnaissance was to observe existing subject property conditions and to obtain information indicating the presence of RECs in connection with the subject property.

6.1 Methodology and Limiting Conditions

The site reconnaissance was conducted by:

1. Observing the subject property from public thoroughfares,
2. Observing the adjacent properties from public thoroughfares,
3. Observing the subject property from driveways, ((*dirt/paved*)) roads, and walking paths/sidewalks.

6.2 General Subject Property Information

Current Use of Property and Adjacent Properties

The subject property is currently vacant land bisected by Lockwood Road. Adjacent businesses/properties include a commercial mall, , commercial building with medical offices, Carmax auto dealer and service center, and a warehouse structure.

Past Use of Property and Adjacent Properties

Based on our site reconnaissance, past uses at the subject property and adjacent properties are not readily apparent.

Current or Past Uses in the Surrounding Areas

The subject property is surrounded by commercial and light industrial land uses as detailed in the Site Description section of this report. Past uses of the surrounding area are not readily apparent based on the site reconnaissance.

Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

Geologic, hydrogeologic, hydrologic, and topographic information are as previously stated in the Physical Setting Sources section of this report.

General Description of Structures

The subject property is currently vacant land.

Roads

The United States 101 Freeway and Ventura Boulevard are located adjacent to the north of the subject property. Outlet Center Drive is adjacent to the east of the subject property. Lockwood Street traverses the subject property through the center.

Potable Water Supply

The City of Oxnard currently supplies potable water to the subject property.

Sewage Disposal System

The subject property is connected to the City of Oxnard sewer system.

Stormwater Runoff

Surface water runoff at the subject property appears to move towards two detention basins located at the northern and southern ends of the subject property. A large plastic pipe appears to mark the drainage point of the basin. Additionally, it appears that water drains to the sewer after sediment settles out of the stormwater. Silt fences and gravel bags are setup across the subject property and along the perimeter of the subject property.

6.3 Exterior Observations

Table 4 provides details regarding the exterior observations noted during the site reconnaissance. Photographs 1 through 10 are shown below.

Table 4 Exterior Observations

Item	Observed	Photograph Number	Description
Hazardous Substances and Petroleum Products in Connection with Identified Uses	No	Not Applicable (N/A)	<i>None observed</i>
Aboveground or Underground Storage Tanks	No	N/A	<i>None observed</i>
Odors	No	N/A	<i>None noted</i>
Pools of Liquid	No	N/A	<i>None observed</i>
Drums	No	N/A	<i>None observed</i>
Hazardous Substances and Petroleum Products Containers Not in Connection with Identified Uses	No	N/A	<i>None observed</i>
Unidentified Substance Containers	No	N/A	<i>None observed</i>
Indications of Polychlorinated Biphenyls (PCBs)	No	N/A	<i>None observed</i>
Heating/Cooling Systems	No	N/A	<i>None observed</i>
Stains or Corrosion	No	N/A	<i>None observed</i>
Drains, Clarifiers, and Sumps	Yes	6	One detention basin was observed in the northeastern center portion of the subject property. There appears to be

Item	Observed	Photograph Number	Description
			a drain in the detention basin and a PVC pipe with an unknown origin located in the vicinity of the detention basin.
Degreasers/Parts Washers		N/A	<i>None observed</i>
Pits, Ponds, and Lagoons	Yes	6	One detention basin was observed in the northeastern center portion of the subject property. There appears to be a drain in the detention basins.
Stained Soil or Stained Pavement		N/A	<i>None observed</i>
Stressed Vegetation		N/A	<i>None observed</i>
Solid Waste/Debris	No	N/A	<i>None observed</i>
Wastewater	No	N/A	<i>None observed</i>
Wells	No	N/A	<i>None observed</i>
Septic Systems/Effluent Disposal Systems	No	N/A	<i>None observed</i>
Soil Piles	No	N/A	<i>None observed</i>
Fill Material	No	N/A	<i>None observed</i>

Photograph 2. Eastern adjacent commercial shopping mall

Photograph 3. Southern adjacent vacant land with soil piles

Photograph 4. Western adjacent Carmax

Photographs 5-8

Photograph 5. General view of subject property with homeless encampment in the northern portion

Photograph 6. Subject property detention basin with drain pipe

Photograph 7. Silt fence located on subject property

Photograph 8. PVC pipe with unknown origin

6.4 Site Reconnaissance Information of Concern

Based on the information obtained during the site reconnaissance, no hazardous material conditions with the potential to impact the subject property were identified.

7 Potential Vapor Migration

The database report and other resources were reviewed to identify nearby known or suspect contaminated sites that have the potential for contaminated vapor originating from the nearby sites to migrate beneath the subject property. Based on the ASTM E2600-15, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the following minimum search distances were initially used to determine if contaminated soil vapors from a nearby known or suspect contaminated site have the potential to be migrating beneath the subject property:

- 1/10 mile (528 feet) for petroleum hydrocarbons
- 1/3 mile (1,760 feet) for other contaminants of concern (COCs)

Groundwater depth and flow direction is also utilized to determine risk of vapor migration. Groundwater in the vicinity of the subject property is reportedly present between 11 and 20 feet and flows to the northwest (Section 3.1).

If known or suspect contaminated sites are located:

- On-site or adjacent to the subject property,
- Within 100 feet, or
- Within the above referenced distances from the subject property and upgradient or crossgradient to the subject property,

Then online resources are reviewed to determine the extent of the contaminated plume at those sites.

The following describes search distances for contaminated plumes of petroleum hydrocarbons (30 feet from the subject property) and other COCs (100 feet from the subject property). Per ASTM E2600-15, vapors associated with impacted soil or groundwater present within these distances have the potential to migrate beneath the subject property.

7.1 Petroleum Hydrocarbons

Known Petroleum Hydrocarbon Release Sites

Based on our review of the information gathered as part of this report, known on-site, adjacent, upgradient, and/or crossgradient release sites identified within 1/10 mile of the subject property are as follows:

Adjacent or Within 100 Feet

- 2101 Ventura Boulevard— Former heavy equipment rental and service facility, known LUST release site, soil and groundwater impacts, closed Ventura County Environmental Health case; soil, soil vapor, or groundwater plume or soil contamination identified 600 feet from subject property (northeast)

Suspect Petroleum Hydrocarbon Release Sites

Based on our review of the information gathered as part of this report, on-site, adjacent, upgradient, and/or crossgradient suspect release sites identified within 1/10 mile of the subject property are as follows:

Adjacent/Within 30 Feet

- 2001 East Ventura Boulevard – Former automotive repair (1980-1996) identified adjacent to the north of the subject property (200 feet), no known releases
- 2001 Ventura Boulevard – Current gas station (2005-present) identified adjacent to the north of the subject property (200 feet), no known releases
- 2099 East Ventura Boulevard – Former gas station (1961) identified adjacent to the north of the subject property, no known releases

Crossgradient

- 1889 Ventura Boulevard – Former gas station (unknown) identified 450 feet from subject property (northwest), no known releases

7.2 Other COCs

Known COC Release Sites

Based on our review of the information gathered as part of this report, known on-site, adjacent, upgradient, and/or crossgradient release sites identified within 1/3 mile of the subject property are as follows:

Crossgradient

- 2000 East Gonzales Road– Known Cleanup Program Site, pesticide soil impacts, closed Ventura County case; soil contamination identified 1,000 feet from subject property (southwest)
- 1950 Williams Drive – Former medical product manufacturing (1968-1986), known release site, DTSC no action required as of 2013, interior structure contamination by chromate compound identified 350 feet from subject property (northeast)

7.3 Vapor Intrusion Information of Concern

Based on the information above, there are no vapor intrusion threats from petroleum hydrocarbons within 30 feet or other COCs within 100 feet of the subject property.

8 Evaluation

Rincon has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 and E1527-21 for the subject property, located in Oxnard, California. Any exceptions to, or deletions from, this practice are described in the Deviations section of this report. This assessment has not revealed evidence of RECs in connection with the subject property, as detailed below in Table 5.

8.1 Significant Data Gaps

No significant data gaps were identified during the preparation of this report.

Table 5 Findings, Opinions, Conclusions, and Recommendations

No.	Finding	Opinion	Conclusion	Recommendations
1	Adjacent gasoline stations and automotive repair (2101 Ventura Boulevard and 2099 East Ventura Blvd.)	According to the historical resources reviewed, the northern adjacent property (2101 Ventura Boulevard) was formerly occupied by an automotive repair from 1980 to 1996. Additionally, a gasoline station has been present at the northern adjacent property from 2005 to 2019 and an additional gasoline station at 2099 East Ventura Boulevard in 1961. However, based on the distance from the subject property (200 feet), the lack of reported release, and the depth and direction of groundwater flow the adjacent gasoline station and former automotive repair are not expected to impact the subject property.	Notable finding	None
3	Former agricultural use of the subject property	According to the historical resources reviewed, the subject property appears to have been used for agricultural purposes as early as 1927. In general, it appears that the subject property remained used for agricultural purposes from approximately 1927 through approximately 1985. Agricultural land use is typically associated with the use of pesticides and arsenic. However, previous soil assessments completed for the subject property identified OCPs and arsenic and lead at levels below the residential ESLs. Therefore, no additional assessment is warranted.	De minimis	None

10 Signatures of Environmental Professionals

The qualified environmental professionals that are responsible for preparing the report include Ryan Thacher and Lisa Bestard. Their qualifications are summarized in the following section.

“We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.”

11 Qualifications of Environmental Consultants

The environmental consultants responsible for conducting this Phase I ESA and preparing the report include Ryan Thacher, Julie Lynne Welch, and Janey Lange. Their qualifications are summarized below.

Environmental Professional Qualifications	X2.1.1 (2) (i) - Professional Engineer or Professional Geologist License or Registration, and 3 years of full-time relevant experience	X2.1.1 (2) (ii) - Licensed or certified by the Federal Government, State, Tribe, or U.S. Territory to perform environmental inquiries	X2.1.1 (2) (iii) – Baccalaureate or Higher Degree from and accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience	X2.1.1 (2) (iii) – Equivalent of 10 years of full-time relevant experience
Ryan Thacher	PE		PhD Environmental Engineering	12 years
Lisa Bestard			BA Biology	9 years
Jon Bridgeman			BA Earth and Environmental Science	3 years
Janey Lange			BA Environmental Studies	< 1 year

Dr. Ryan Thacher, PE, is a Director of Site Assessment and Remediation with Rincon Consultants. He holds a Bachelor of Science degree in Chemical Engineering from the University of California, Santa Barbara and a Doctorate degree in Environmental Engineering from the University of Southern California. He has 12 years of experience conducting research related to chemical contaminant fate and transport in soil and groundwater and developing and implementing site assessments and remediation for contaminated sites in California, including the preparation of Phase I and Phase II Environmental Site Assessments. Dr. Thacher is a Professional Engineer (#87757) with the State of California.

Lisa Bestard is a Senior Environmental Scientist with Rincon Consultants. She holds a Bachelor of Arts degree in Biology from University of San Diego, San Diego, California. Ms. Bestard has extensive experience performing Due Diligence Phase I and Phase II ESAs and various remediation projects and providing soil and waste management services. She has 21 years of experience conducting research, assessment, and remediation projects in California. Ms. Bestard’s responsibilities at Rincon include implementation of site assessments and development of site remediation programs within the Environmental and Earth Systems Group.

Jon Bridgeman is an Environmental Scientist with Rincon Consultants. He holds a Bachelor of Arts degree in Earth and Environmental Science from the University of California Los Angeles, and a Master of Science degree in Earth and Environmental Science from Tulane University. Mr. Bridgeman has over three years of consulting experience including site visits/inspections, soil and groundwater assessments, and surficial sampling in sensitive wetlands and rivers, as well as groundwater monitoring. His experience includes Phase I ESA site visits, soil remediation projects, and wetland, coastal, and riverine sampling projects. Jon has assisted in the implementation of

Phase I ESAs, and development of watershed monitoring surveys, beneficial use analysis reports, and stormwater technical reports.

Janey Lange is an Environmental Scientist with Rincon Consultants. She holds a Bachelor of Arts degree in Environmental Studies from the University of San Diego. Ms. Lange's responsibilities at Rincon include implementation of Phase I ESAs and preparation of other environmental reports for a variety of commercial, rural, and industrial properties.

Appendix A

Interview Documentation

User Questionnaire

Rincon Project Number: 22-13677
Site Name and Full Address: APN 213-009-101-5, Oxnard, California

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

We respectfully request that you fill out this form and email it to Janey Lange at jlange@Rinconconsultants.com within one week from the date of this transmittal.

Project Description

1. Why is the Phase I ESA required or being performed?

SALE AND DEVELOPMENT OF THE SITE

2. What type of property transaction is planned? (i.e. sale, purchase, exchange)

SALE

3. What is the entire site address?

2151 LOCKWOOD STREET, OXNARD CA 93036

4. What is the Assessor's Parcel Number(s)?

APN: 213-0-090-275

5. Are any considerations beyond the requirements of Practice E1527 to be considered? (i.e. lien search, asbestos & lead based paint, radon)

NO

Rincon Project Number: 22-13677

Site Name and Full Address: APN 213-009-101-5, Oxnard, California

6. Identify all parties who will rely on the Phase I report.

SVM-LOCKWOOD, LLC
CANFIELD DEVELOPMENT
SUNBELT ENTERPRISES, LLC

7. Identify the Site Manager/Contact and how the contact can be reached.

Mark Ross (818) 667-7512

8. Identify the Site Owner and how the owner can be reached.

SAME AS ABOVE

9. Do you have copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning any other knowledge or experience with the property that may be pertinent to the environmental professional (i.e. lien search, title report, chain of title, previous Phase I and II ESAs, Environmental Impact Studies)?

RINCON

Rincon Project Number: 22-13677

Site Name and Full Address: APN 213-009-101-5, Oxnard, California

Subject Property Information

1. Did a search of recorded land title records (or judicial records, where appropriate) identify any environmental liens filed or recorded against the property?

Please mark the box with the most appropriate response:

- ☒ I **have not** reviewed the records and **do not know** if there are any filed or recorded environmental liens.
- ☐ I **have** reviewed the records, and **No, there aren't any** filed or recorded environmental liens.
- ☐ I **have** reviewed the records, and **Yes, there are** environmental liens. Explain:

2. Did a search of recorded land title records (or judicial records, where appropriate) identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Please mark the box with the most appropriate response:

- ☒ I **have not** reviewed the records and **do not know** if there are any filed/recorded AULs or any AULs in place at the site.
- ☐ I **have** reviewed the records, and **No, there aren't any** filed/recorded AULs or any AULs in place at the site.
- ☐ I **have** reviewed the records, and **Yes, there are** AULs filed, recorded, and/or in place at the site. Explain:

3. Does the Title Report provide any information pertaining to environmental cleanup liens or activity and use limitations (AULs) for the subject property?

Please mark the box with the most appropriate response:

- ☒ I **have not** reviewed the Title Report and **do not know** if it provides environmental cleanup liens or AULs information.
- ☐ I **have** reviewed the Title Report, and **No, it does not provide** environmental cleanup liens or AULs information..
- ☐ I **have** reviewed the Title Report, and **Yes, it does provide** environmental cleanup liens or AULs information. Explain:

Rincon Project Number: 22-13677

Site Name and Full Address: APN 213-009-101-5, Oxnard, California

4. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Please mark the box with the most appropriate response:

☐ **No, I do not** have any specialized knowledge and/or experience related to the property or nearby properties.

☒ **Yes, I do** have specialized knowledge and/or experience related to the property or nearby properties. Explain:

ADJACENT PARCELS SITE WORK AND SALE.

5. As the user of this ESA, based on your knowledge and experience related to the property, are you aware of any information pertaining to a reduction in value for the subject property relative to any known environmental issues?

Please mark the box with the most appropriate response:

☒ **No, I do not** have any information about a reduction in property value relative to environmental issues.

☐ **Yes, I do** have information about a reduction in property value relative to environmental issues. Explain:

6. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

Please mark the box with the most appropriate response:

☐ **Yes, I do** believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Skip to question #7.

☐ **No, I do not** believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Proceed to question #6a.

- a. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? (40 CFR 312.29)

Please mark the box with the most appropriate response

☐ **No, I have not** considered the idea that known or believed contamination at the site has caused the lower purchase price.

☐ **Yes, I have** considered the idea that known or believed contamination at the site has caused the lower purchase price. Explain:

Rincon Project Number: 22-13677

Site Name and Full Address: APN 213-009-101-5, Oxnard, California

7. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

Please mark the box with the most appropriate response:

- a. Do you know the past uses of the property?

☒ I **do not** know.
☐ I **do** know. Explain:

- b. Do you know of specific chemicals are present or once were present at the property?

☒ I **do not** know.
☐ I **do** know. Explain:

- c. Do you know of any spills or other chemical releases that have taken place at the property?

☒ I **do not** know.
☐ I **do** know. Explain:

- d. Do you know of any environmental cleanups have taken place at the property?

☒ I **do not** know.
☐ I **do** know. Explain:

8. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Please mark the box with the most appropriate response:

☒ **No**, I do not know and/or do not have any experience with any obvious indicators that point to the presence or likely presence of contamination at the property.
☐ **Yes**, I do know of and/or do have experience with obvious indicators that point to the presence or likely presence of contamination at the property. Explain:

Rincon Project Number: 22-13677

Site Name and Full Address: APN 213-009-101-5, Oxnard, California

9. Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site?

Please mark the box with the most appropriate response:

- ☒ **No**, I am not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site.
- ☐ **Yes**, I am aware of pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site. Explain:

10. Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site?

Please mark the box with the most appropriate response:

- ☒ **No**, I am not aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site.
- ☐ **Yes**, I am aware of pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site. Explain:

11. Are you aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

Please mark the box with the most appropriate response:

- ☒ **No**, I am not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products..
- ☐ **Yes**, I am aware of a notice, or notices, from a government entity (or multiple government entities) regarding a possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. Explain:

Rincon Project Number: 22-13677

Site Name and Full Address: APN 213-009-101-5, Oxnard, California

UPDATED PRELIMINARY REPORT

*In response to the application for a policy of title insurance referenced herein, **Fidelity National Title Company** hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.*

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(s) of title insurance to be issued hereunder will be policy(s) of Fidelity National Title Insurance Company, a Florida Corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

EXCEPTIONS
(Continued)

18. Please be advised that our search did not disclose any open Deeds of Trust of record. If you should have knowledge of any outstanding obligation, please contact the Title Department immediately for further review prior to closing.
19. Matters which may be disclosed by an inspection and/or by a correct ALTA/NSPS Land Title Survey of said Land that is satisfactory to the Company, and/or by inquiry of the parties in possession thereof.
20. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

PLEASE REFER TO THE "INFORMATIONAL NOTES" AND "REQUIREMENTS" SECTIONS WHICH FOLLOW FOR INFORMATION NECESSARY TO COMPLETE THIS TRANSACTION.

END OF EXCEPTIONS

REQUIREMENTS SECTION

1. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the entity named below:

Limited Liability Company: Sunbelt Enterprises, LLC

- a) A copy of its operating agreement, if any, and all amendments, supplements and/or modifications thereto, certified by the appropriate manager or member.
 - b) If a domestic Limited Liability Company, a copy of its Articles of Organization and all amendments thereto with the appropriate filing stamps.
 - c) If the Limited Liability Company is member-managed, a full and complete current list of members certified by the appropriate manager or member.
 - d) A current dated certificate of good standing from the proper governmental authority of the state in which the entity is currently domiciled.
 - e) If less than all members, or managers, as appropriate, will be executing the closing documents, furnish evidence of the authority of those signing.
 - f) If Limited Liability Company is a Single Member Entity, a Statement of Information for the Single Member will be required.
 - g) Each member and manager of the LLC without an Operating Agreement must execute in the presence of a notary public the Certificate of California LLC (Without an Operating Agreement) Status and Authority form.
2. Unrecorded matters which may be disclosed by an Owner's Affidavit or Declaration. A form of the Owner's Affidavit/Declaration is attached to this Preliminary Report/Commitment. This Affidavit/Declaration is to be completed by the record owner of the land and submitted for review prior to the closing of this transaction. Your prompt attention to this requirement will help avoid delays in the closing of this transaction. Thank you.

The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit/Declaration.

END OF REQUIREMENTS

INFORMATIONAL NOTES SECTION

1. None of the items shown in this report will cause the Company to decline to attach CLTA Endorsement Form 100 to an Extended Coverage Loan Policy, when issued.
2. Note: The policy of title insurance will include an arbitration provision. The Company or the insured may demand arbitration. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. Please ask your escrow or title officer for a sample copy of the policy to be issued if you wish to review the arbitration provisions and any other provisions pertaining to your Title Insurance coverage.
3. Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.
4. Pursuant to Government Code Section 27388.1, as amended and effective as of 1-1-2018, a Documentary Transfer Tax (DTT) Affidavit may be required to be completed and submitted with each document when DTT is being paid or when an exemption is being claimed from paying the tax. If a governmental agency is a party to the document, the form will not be required. DTT Affidavits may be available at a Tax Assessor-County Clerk-Recorder.
5. The Company and its policy issuing agents are required by Federal law to collect additional information about certain transactions in specified geographic areas in accordance with the Bank Secrecy Act. If this transaction is required to be reported under a Geographic Targeting Order issued by FinCEN, the Company or its policy issuing agent must be supplied with a completed ALTA Information Collection Form ("ICF") prior to closing the transaction contemplated herein.

To protect the private information contained in the attached form and photo ID, please return via a secured method.
6. Due to the special requirements of SB 50 (California Public Resources Code Section 8560 et seq.), any transaction that includes the conveyance of title by an agency of the United States must be approved in advance by the Company's State Counsel, Regional Counsel, or one of their designees.
7. Note: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.

Alex Lee/ng1

Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. **DO NOT** use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened.** **DO NOT** send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do **NOT** reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

Federal Bureau of Investigation:
<http://www.fbi.gov>

Internet Crime Complaint Center:

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

Not all discounts are offered by every FNF Company. The discount will only be applicable to the FNF Company as indicated by the named discount.

Available Discounts

DISASTER LOANS (CTIC, CLTIC, FNTIC)

The charge for a Lender's Policy (Standard or Extended coverage) covering the financing or refinancing by an owner of record, within twenty-four (24) months of the date of a declaration of a disaster area by the government of the United States or the State of California on any land located in said area, which was partially or totally destroyed in the disaster, will be fifty percent (50%) of the appropriate title insurance rate.

CHURCHES OR CHARITABLE NON-PROFIT ORGANIZATIONS (CTIC, FNTIC)

On properties used as a church or for charitable purposes within the scope of the normal activities of such entities, provided said charge is normally the church's obligation the charge for an owner's policy shall be fifty percent (50%) to seventy percent (70%) of the appropriate title insurance rate, depending on the type of coverage selected. The charge for a lender's policy shall be forty (40%) to fifty percent (50%) of the appropriate title insurance rate, depending on the type of coverage selected.

FIDELITY NATIONAL FINANCIAL, INC.

PRIVACY NOTICE

Effective August 1, 2021

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

Collection of Personal Information

FNF may collect the following categories of Personal Information:

- contact information (e.g., name, address, phone number, email address);
- demographic information (e.g., date of birth, gender, marital status);
- identity information (e.g. Social Security Number, driver's license, passport, or other government ID number);
- financial account information (e.g. loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Collection of Browsing Information

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for three main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;

- to nonaffiliated third party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law. We may share your Personal Information with affiliates (other companies owned by FNF) to directly market to you. Please see "Choices with Your Information" to learn how to restrict that sharing.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information

We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information

If you do not want FNF to share your information among our affiliates to directly market to you, you may send an "opt out" request as directed at the end of this Privacy Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you without your consent.

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (<https://fnf.com/pages/californiaprivacy.aspx>) or call (888) 413-1748.

For Nevada Residents: You may be placed on our internal Do Not Call List by calling (888) 714-2710 or by contacting us via the information set forth at the end of this Privacy Notice. Nevada law requires that we also provide you with the following contact information: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: BCPINFO@ag.state.nv.us.

For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

Information From Children

The FNF Websites are not intended or designed to attract persons under the age of eighteen (18). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users

FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans

Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice.

Accessing and Correcting Information; Contact Us

If you have questions, would like to correct your Personal Information, or want to opt-out of information sharing for affiliate marketing, visit FNF's [Opt Out Page](#) or contact us by phone at (888) 714-2710 or by mail to:

Fidelity National Financial, Inc.
601 Riverside Avenue,
Jacksonville, Florida 32204

ATTACHMENT ONE (Revised 05-06-16)

CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
- (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
 - (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
 - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
 - (c) resulting in no loss or damage to the insured claimant;
 - (d) attaching or created subsequent to Date of Policy; or
 - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)

ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
 - a. building;
 - b. zoning;
 - c. land use;
 - d. improvements on the Land;
 - e. land division; and
 - f. environmental protection.This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
 - a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
 - b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;

- c. that result in no loss to You; or
- d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
- 5. Failure to pay value for Your Title.
- 6. Lack of a right:
 - a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
 - b. in streets, alleys, or waterways that touch the Land.
 This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
- 7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
- 8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
- 9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or \$2,500.00 (whichever is less)	\$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or \$5,000.00 (whichever is less)	\$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or \$5,000.00 (whichever is less)	\$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or \$2,500.00 (whichever is less)	\$ 5,000.00

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection;
 or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13 or 14); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - (a) a fraudulent conveyance or fraudulent transfer, or
 - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

{Except as provided in Schedule B - Part II, {t{or T}his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

{PART I

{The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.}

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:}

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
 - (a) a fraudulent conveyance or fraudulent transfer; or
 - (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

{The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown in the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and that are not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

7. {Variable exceptions such as taxes, easements, CC&R's, etc. shown here.}

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY – ASSESSMENTS PRIORITY (04-02-15)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - (a) a fraudulent conveyance or fraudulent transfer, or
 - (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

*Note: For C.C.&R.'s pertaining to Tract 5481,
see Doc. No. 050505-0109718 of Official Records*

OWNER'S DECLARATION

The undersigned hereby declares as follows:

1. (Fill in the applicable paragraph and strike the other)
 - a. Declarant ("Owner") is the owner or lessee, as the case may be, of certain premises located at _____,
further described as follows: See Preliminary Report/Commitment No. 00049386-017-TEW-AL for full legal description (the "Land").
 - b. Declarant is the _____ of _____
("Owner"), which is the owner or lessee, as the case may be, of certain premises located at _____,
further described as follows: See Preliminary Report/Commitment No. 00049386-017-TEW-AL for full legal description (the "Land").
2. (Fill in the applicable paragraph and strike the other)
 - a. During the period of six months immediately preceding the date of this declaration no work has been done, no surveys or architectural or engineering plans have been prepared, and no materials have been furnished in connection with the erection, equipment, repair, protection or removal of any building or other structure on the Land or in connection with the improvement of the Land in any manner whatsoever.
 - b. During the period of six months immediately preceding the date of this declaration certain work has been done and materials furnished in connection with _____ upon the Land in the approximate total sum of \$_____, but no work whatever remains to be done and no materials remain to be furnished to complete the construction in full compliance with the plans and specifications, nor are there any unpaid bills incurred for labor and materials used in making such improvements or repairs upon the Land, or for the services of architects, surveyors or engineers, except as follows: _____. Owner, by the undersigned Declarant, agrees to and does hereby indemnify and hold harmless Fidelity National Title Company against any and all claims arising therefrom.
3. Owner has not previously conveyed the Land; is not a debtor in bankruptcy (and if a partnership, the general partner thereof is not a debtor in bankruptcy); and has not received notice of any pending court action affecting the title to the Land.
4. Except as shown in the above-referenced Preliminary Report/Commitment, there are no unpaid or unsatisfied mortgages, deeds of trust, Uniform Commercial Code financing statements, regular assessments, special assessments, periodic assessments or any assessment from any source, claims of lien, special assessments, or taxes that constitute a lien against the Land or that affect the Land but have not been recorded in the public records. There are no violations of the covenants, conditions and restrictions as shown in the above-referenced Preliminary Report/Commitment.
5. The Land is currently in use as _____; _____ occupy/occupies the Land; and the following are all of the leases or other occupancy rights affecting the Land:

6. There are no other persons or entities that assert an ownership interest in the Land, nor are there unrecorded easements, claims of easement, or boundary disputes that affect the Land.
7. There are no outstanding options to purchase or rights of first refusal affecting the Land.

This declaration is made with the intention that Fidelity National Title Company (the "Company") and its policy issuing agents will rely upon it in issuing their title insurance policies and endorsements. Owner, by the undersigned Declarant, agrees to indemnify the Company against loss or damage (including attorneys fees, expenses, and costs) incurred by the Company as a result of any untrue statement made herein.

I declare under penalty of perjury that the foregoing is true and correct and that this declaration was executed on ____ at _____.

Oxnard, California 93030

**Subject: Phase I Environmental Site Assessment
APN 213-009-010-5, Oxnard, California**

Dear Mr. Brock:

This report presents the findings of a Phase I Environmental Site Assessment (ESA) completed by Rincon Consultants, Inc. for the property located on Lockwood Street, assigned Assessor's Parcel Number (APN) 213-009-010-5, Oxnard, California. The Phase I ESA was performed in accordance with our proposal and contract dated June 25, 2014.

The accompanying report presents our findings and provides an opinion regarding the presence of recognized environmental conditions. Our work program for this project is intended to meet the guidelines outlined in the American Society for Testing and Materials (ASTM), Standard Practice for Environmental Site Assessments: *Phase I Environmental Site Assessment Process* (ASTM Standard E-1527-13). Our scope of services, pursuant to ASTM practice, did not include any inquiries with respect to asbestos containing building materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, wetlands, or high voltage power lines.

Thank you for selecting Rincon for this project. If you have any questions, or if we can be of any future assistance, please contact us.

Sincerely,
RINCON CONSULTANTS, INC.

Sarah A. Larese
Senior Environmental Scientist

Michael P. Gialketsis

EXECUTIVE SUMMARY

This report presents the findings of a Phase I Environmental Site Assessment (ESA) for the property located on Lockwood Street and identified as Assessor's Parcel Number (APN) 213-009-010-5, in Oxnard, California (Figure 1, Vicinity Map). The subject property is currently vacant land.

Rincon Consultants performed a reconnaissance of the subject property on July 10, 2014. The purpose of the reconnaissance was to observe existing subject property conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the subject property. The subject property was observed to be vacant, unpaved land. Rincon observed what appeared as an approximately 4-inch diameter, vertical PVC pipe filled with concrete within an 8-inch PVC pipe, located on the central-western portion of the subject property. The property owner was not aware of the purpose of the PVC pipe. Rincon observed scattered plastic and paper litter, concrete material, asphalt, glass, household furniture, and clothing and wood debris located throughout the subject property. No obvious evidence of hazardous waste disposal at the subject property was observed. Therefore, the solid waste and debris is considered *de minimis*.

The subject property is located in an area that is primarily developed with educational and commercial land uses. Properties in the vicinity of the subject property include Cal Lutheran University, a commercial shopping center, and medical offices to the east, a medical plaza to the south, commercial businesses to the west, and US Highway 101 to the north.

EDR was contracted to provide a database search of public lists of sites that generate, store, treat or dispose of hazardous materials or sites for which a release or incident has occurred. The EDR search was conducted for the subject property and included data from surrounding sites within a specified radius of the property. The subject property was not listed on the databases reviewed. Two properties adjacent to the west of the subject property were listed on regulatory databases. Teleflex Control Systems/Becton Dickinson & Co at 1950 Williams Drive was listed on the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS), Resource Conservation and Recovery Act (RCRA) Small Quantity Generator (SQG), and underground storage tank (UST) databases. Chromate blooms were reported on basement walls and floors of the facility in the 1990s, with the last known appearance of the blooms in 1998. As of 2013, the USEPA and DTSC categorized the site status as "No Further Remedial Action Planned (NFRAP)" and "No Action Required." Based on the nature of the issues reported at this property (interior chromate blooms) and the status (no further action required), this facility is not expected to impact the subject property. Carmax No. 6014/Cars 101 at 2001 Lockwood Street was listed on the RCRA SQG and aboveground storage tank (AST) databases. Based on the fact this facility is not listed on databases reporting unauthorized releases of hazardous materials and wastes, this facility is not expected to impact the subject property. No unauthorized release sites reported to be located within one-eighth mile of the subject property and interpreted to be upgradient were listed in the databases searched by EDR.

Historical sources reviewed as part of the Phase I ESA included aerial photographs, topographic maps, and city directories. The records reviewed indicate that the subject property

was developed with a ranch and used for agricultural purposes from 1904 to 1989. The subject property has been vacant land from 1994 to the present.

Based on the findings of this Phase I ESA, it is our opinion that there is one potential Recognized Environmental Condition (REC) in connection with the property as follows:

Potential Recognized Environmental Condition

1. Historical agricultural land use at the subject property

Due to the historic use of the subject property for agricultural purposes, there is a potential that the subject property could be affected with pesticides, or other chemicals used routinely in agricultural production. To determine if pesticides are present in the soil beneath the site we recommend collecting shallow soil samples from the subject property and analyzing these samples for pesticides and arsenic.

While the presence of the PVC pipe observed on the subject property is likely considered *de minimis*, the purpose of the pipe should be determined.

INTRODUCTION

This report presents the findings of a Phase I ESA conducted for the property located on Lockwood Street and identified as APN 213-009-010-5 in Oxnard, California. The Phase I ESA was performed by Rincon Consultants, Inc. for Sunbelt Enterprises in general conformance with ASTM E 1527-13 and our proposal dated June 25, 2014. The following sections present our findings and provide our opinion as to the potential presence and impact of environmental site conditions.

PURPOSE

The purpose of this Phase I ESA was to assess the environmental conditions of a property, taking into account commonly and reasonably ascertainable information and to qualify for Landowner Liability Protections under the Brownfields Amendments to CERCLA Liability.

A recognized environmental condition (REC) is defined pursuant to ASTM E 1527-13 as,

“the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; 3) under conditions that pose a material threat of a future release to the environment”.

A Controlled REC is defined pursuant to ASTM E 1527-13 as,

“a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a

controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report”.

A Historical REC is defined pursuant to ASTM E 1527-13 as,

“a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by regulatory authority, without subjecting the property to any required controls (for example, use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition”.

A de minimis condition is defined pursuant to ASTM E 1527-13 as,

“a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions”.

DETAILED SCOPE OF SERVICES

The scope of services conducted for this study is outlined below:

- Perform a reconnaissance of the site to identify obvious indicators of the existence of hazardous materials.
- Observe adjacent or nearby properties from public thoroughfares in an attempt to see if such properties are likely to use, store, generate, or dispose of hazardous materials.
- Obtain and review an environmental records database search from Environmental Data Resources (EDR), Inc. to obtain information about the potential for hazardous materials to exist at the subject property or at properties located in the vicinity of the subject property.
- Review files for the subject property and immediately adjacent properties as identified in the EDR report, as applicable.
- Review the current U.S. Geological Survey (USGS) topographic map to obtain information about the subject property’s topography and uses of the subject property and properties in the vicinity of the subject property.
- Review additional pertinent record sources (e.g., California Division of Oil and Gas records, online databases of hazardous substance release sites), as necessary, to identify the presence of RECs at the subject property.
- Review reasonably ascertainable historical resources (e.g., aerial photographs, topographic maps, fire insurance maps, city directories) to assess the historical land use of the subject property and adjacent properties.

- Provide a property owner interview questionnaire to the property owner or a designated subject property representative identified to Rincon by Sunbelt Enterprises, LLC.
- Provide a user interview questionnaire to a representative of Sunbelt Enterprises, LLC, the user of the Phase I ESA.
- Conduct interviews with other property representatives (e.g., key site manager, occupants), as applicable.
- Review Client-provided information (e.g., previous environmental reports, title documentation), as applicable.

Consistent with ASTM E 1527-13 practice, our work scope did not include any inquiries with respect to asbestos containing building materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to release of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, wetlands, or high voltage power lines.

SIGNIFICANT ASSUMPTIONS, LIMITATIONS, DEVIATIONS, EXCEPTIONS, SPECIAL TERMS AND CONDITIONS

We understand that Sunbelt Enterprises, LLC has requested this assessment and will use the assessment to provide information for insurance purposes. No other use or disclosure is intended or authorized by Rincon. Also, this report is issued with the understanding that it is to be used only in its entirety. It is intended for use only by Sunbelt Enterprises, LLC, and no other person or entity may rely upon the report without the express written consent of Rincon.

This work is intended to adhere to good commercial, customary, and generally accepted environmental investigation practices for similar investigations conducted at this time and in this geographic area. No guarantee or warranties, expressed or implied are provided. The findings and opinions conveyed in this report are based on findings derived from a site reconnaissance, review of an environmental database report, specified regulatory records and historical sources, and comments made by interviewees. This report is not intended as a comprehensive site characterization and should not be construed as such. Standard data sources relied upon during the completion of Phase I ESAs may vary with regard to accuracy and completeness. Although Rincon believes the data sources are reasonably reliable, Rincon cannot and does not guarantee the authenticity or reliability of the data sources it has used. Additionally, pursuant to our contract, the data sources reviewed included only those that are practically reviewable without the need for extraordinary analysis.

Rincon has not found evidence that hazardous materials or petroleum products exist at the subject property at levels likely to warrant mitigation. Rincon does not under any circumstances warrant or guarantee that not finding evidence of hazardous materials or petroleum products means that hazardous materials or petroleum products do not exist on the subject property. Additional research, including surface or subsurface sampling and analysis, can reduce the Sunbelt Enterprises, LLC's risks, but no techniques commonly employed can eliminate these risks altogether. In addition, in accordance with our authorized work scope and contract, no attempt was made to check for the presence of asbestos containing building

materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to release of hazardous substances or petroleum products into the environment, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, wetlands, or high voltage power lines.

USER RELIANCE

This Phase I ESA was prepared for use solely and exclusively by Sunbelt Enterprises, LLC. This report shall not be relied upon by or transferred to any other party without the express written authorization of Rincon Consultants.

SITE DESCRIPTION

Location

The subject property is an approximately 11-acre property located north and south of Lockwood Street, west of Outlet Center Drive, in Oxnard, California (Figure 2, Site Map). The subject property has been assigned APN 213-009-010-5.

Subject Property and Vicinity General Characteristics

The subject property is currently vacant, unpaved land. The subject property is located in an area that is primarily developed with educational and commercial land uses. Properties in the vicinity of the subject property include Cal Lutheran University, a commercial shopping center, and medical offices to the east, a medical plaza to the south, commercial businesses to the west, and Highway 101 to the north. The current adjacent land uses are described in Table 1 and depicted on Figure 3, Adjacent Land Use Map.

Table 1 - Current Uses of Adjacent Properties

Area	Use
Northern Properties	Highway 101
Eastern Properties	Cal Lutheran University (2201 Outlet Center Drive), commercial shopping center (The Palms), and Women and Children Medical Group (2000 Outlet Center Drive)
Western Properties	CarMax – used car sales (2000 & 2001 Lockwood Street); Lockwood Street and dirt alley
Southern Properties	Palms Medical Plaza (1901 Outlet Center Drive)

Descriptions of Structures, Roads, Other Improvements on the Site

The subject property is currently vacant land, and no structures were observed onsite during the site reconnaissance. Access to the subject property is available from a driveway located on Lockwood Street.

Water and sewer service is provided by the City of Oxnard. Southern California Edison (SCE) provides electrical service, and the Southern California Gas Company provides natural gas service. Solid waste collection and disposal services are provided by the City of Oxnard.

USER PROVIDED INFORMATION

As described in ASTM E 1527-13 Section 6, the user of this Phase I ESA was interviewed for actual knowledge pertaining to the subject property to help identify recognized environmental conditions in connection with the property. Ms. Tanya Reichenbach, Property Manager for Sunbelt Enterprises LLC, completed the User Questionnaire as provided by ASTM Appendix X3, on July 1, 2014. A copy of the completed questionnaire is included as Appendix 1. The following information is based on our review of the completed questionnaire.

Based on our review of the completed questionnaire, the user did not review the following sources of information and is unaware of information regarding the following:

- recorded land title records (or judicial records, where appropriate) that identify any environmental liens filed or recorded against the property
- recorded land title records (or judicial records, where appropriate) that identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law
- Title Report that identifies information pertaining to environmental cleanup liens or AULs for the subject property
- specialized knowledge or experience related to the property or nearby properties
- reduction in value for the subject property relative to any known environmental issues
- commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases
- obvious indicators that point to the presence or likely presence of releases at the property
- pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site
- pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site
- notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

RECORDS REVIEW

PHYSICAL SETTING SOURCES

Topography

The current USGS topographic map (Oxnard Quadrangle, 1949, photorevised 1967) indicates that the subject property is situated at an elevation of approximately 80 feet above mean sea level with generally flat topography. The site vicinity generally slopes downward toward the south.

Geology and Hydrogeology

The project site is located within the Transverse Ranges Geomorphic Province, which is characterized by east-west trending structural features in contrast to the dominant northwest-southeast structural trend of California. The site is situated in the Oxnard Plain Basin, a large structural basin within the Province.

Site Geology

According to the Geologic Map of the Oxnard 7.5 Minute Quadrangle (Clahan, 2003), the subject property is underlain by Holocene alluvial deposits, which are described as deposited as overbank material and composed of “unconsolidated, poorly sorted, clayey sand with some gravel.”

Regional Groundwater Occurrence and Quality

The project site is located within the Oxnard Plain Pressure Basin, part of the Oxnard Plain Ground Water Basin. The Oxnard Plain Pressure Basin consists of three distinct hydrogeologic units (from top to bottom) - the semi-perched aquifer and clay cap, the Upper Aquifer System, and the Lower Aquifer System. The semi-perched aquifer extends from the base of developed soil horizons to an average depth of approximately 75 feet over most of the Oxnard Plain. This aquifer consists primarily of geologically recent stream-deposited sands and gravels, with minor silt and clay interbeds. The semi-perched zone is generally of poor water quality and limited quantity. The clay cap underlies the semiperched aquifer zone and acts as an aquitard for the underlying Upper Aquifer System. The Upper and Lower Aquifer Systems have historically been used for water supply although water quality varies throughout the Basin as a result of sea water intrusion. Regionally groundwater flow is toward the south-southwest.

The State Water Resources Control Board (SWRCB) GeoTracker database was reviewed for information regarding depth to groundwater and groundwater flow direction at nearby unauthorized release facilities. According to a December 2009 case closure summary prepared by the Ventura County Department of Environmental Health for an unauthorized release located at 2101 Ventura Boulevard (approximately 365 feet northeast of the subject property), depth to groundwater was approximately 11 to 20 feet below grade, with a direction of groundwater flow to the northwest.

STANDARD ENVIRONMENTAL RECORD SOURCES

Environmental Data Resources, Inc. (EDR) was contracted to provide a database search of public lists of sites that generate, store, treat or dispose of hazardous materials or sites for which a release or incident has occurred. The EDR search was conducted for the subject property and included data from surrounding sites within specified radii of the property. A copy of the EDR report, which specifies the ASTM search distance for each public list, is included as Appendix 2. As shown on the attached EDR report, federal, state and county lists were reviewed as part of the research effort. Please refer to Appendix 2 for a complete listing of sites reported by EDR and a description of the databases reviewed.

The Map Findings Summary, included in the EDR report, provides a summary of the databases searched, the number of reported facilities within the search radii, and whether the facility is located onsite or adjacent to the subject property. The following information is based on our review of the Map Findings Summary and the information contained in the EDR report.

Subject Property

The subject property was not listed on the databases reviewed.

Offsite Properties

Offsite properties listed by EDR fall under two general categories of databases: those reporting unauthorized releases of hazardous substances (e.g., LUST, National Priority List [a.k.a. Superfund sites], and corrective action facilities), and databases of businesses permitted to use hazardous materials or generate hazardous wastes, for which an unauthorized release has not been reported to a regulatory agency.

Rincon reviewed the EDR Radius Map and select detailed listings to evaluate their potential to impact the subject property, based on the following factors:

- Reported distance of the facility from the subject property
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes
- Reported case type (e.g., soil only, failed UST test only)
- Reported substance released (e.g., chlorinated solvents, gasoline, metals)
- Reported regulatory agency status (e.g., case closed, “no further action”)
- Location of the facility with respect to the reported groundwater flow direction (discussed in the Geology and Hydrogeology section of this report)

Facilities/properties that were interpreted by Rincon to be of potential environmental concern to the subject property, based on one or more of the factors listed above, are summarized in Table 2. In accordance with ASTM, contamination migration pathways in soil, groundwater, and soil vapor were considered in our analysis of offsite properties of potential environmental concern.

Table 2 - EDR Listing Summary of Select Sites within One-Eighth Mile of the Subject Site

Site Name	EDR Site ID	Site Address	Distance from Subject Property (miles)	Database Reference
Adjacent Properties				
Teleflex Control Systems/Becton Dickinson & Co	C6/C7/C8	1950 Williams Drive	Adjacent to the west	CERCLIS, RCRA SQG, UST
Carmax No. 6014/Cars 101	E15/E16	2001 Lockwood Street	Adjacent to the west	RCRA SQG, AST

Regulatory agency information reviewed for the listings in the table above is summarized in the Additional Environmental Record Sources section of this report. No unauthorized release sites

reported to be located within one-eighth mile of the subject property and interpreted to be upgradient were listed in the databases searched by EDR.

Orphan Listings

EDR reported orphan or unmapped site listings, which EDR is unable to plot due to insufficient address information. Based on Rincon's review of the limited address information or site descriptions for the orphan listings, none of the listings are expected to impact the subject property.

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

Review of Agency Files

As a follow-up to the database search, Rincon reviewed regulatory information for facilities within the specified search radii that were interpreted to have the potential to impact the subject property, based on one or more factors previously discussed (e.g., distance, open case status, up-gradient location, soil vapor migration).

The following is a summary of our review of regulatory information obtained from review of online sources (e.g., SWRCB GeoTracker database, DTSC Envirostor database) and/or files requested from the applicable regulatory agency, as described below. Copies of selected documents reviewed are included in Appendix 2.

Subject Property

The subject property was not listed in the databases reviewed by EDR.

Adjacent Properties

Two adjacent properties were reported by EDR, as discussed below.

- *Teleflex Control Systems/Becton Dickinson & Co, 1950 Williams Drive*: This property located adjacent to the west of the subject property was listed on the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS), Resource Conservation and Recovery Act (RCRA) Small Quantity Generator (SQG), and underground storage tank (UST) databases. According to EDR, the CERCLIS database "contains sites which are either proposed to or on the National Priorities List (NPL) [Superfund list] and sites which are in the screening and assessment phase for possible inclusion on the NPL."

The DTSC Envirostor database was reviewed for information in connection with this facility. According to the DTSC Envirostor database summary, Becton Dickinson manufactured medical products at this property from 1968 to 1986, and chromate materials were used in a water cooling tower. Teleflex Control Systems/Telair International operated at the property from 1990 to approximately 2004. Chromate

blooms were reported on basement walls and floors of the facility in the 1990s, with the last known appearance of the blooms in 1998.

As of January 2013, this facility was categorized by the USEPA as “No Further Remedial Action Planned (NFRAP)” and did not qualify for the NPL. The DTSC categorized the site status as “No Action Required” in June 2013. The UST associated with this facility was reported to be inactive. Based on the nature of the issues reported at this property (interior chromate blooms) and the status (no further action required), this facility is not expected to impact the subject property.

- *Carmax No. 6014/Cars 101, 2001 Lockwood Street:* This property located adjacent to the west of the subject property was listed on the RCRA SQG and aboveground storage tank (AST) databases. According to EDR, this facility is a small quantity generator of ignitable hazardous wastes and non-halogenated solvents, with no reported violations. Based on the fact this facility is not listed on databases reporting unauthorized releases of hazardous materials and wastes, this facility is not expected to impact the subject property.

Up-gradient Release Sites

No unauthorized release sites reported to be located within one-eighth mile of the subject property and interpreted to be upgradient were listed in the databases searched by EDR.

Known or Suspect Contaminated Release Sites with Potential Vapor Migration

The EDR report was reviewed to identify nearby known or suspect contaminated sites that have the potential for contaminated vapor originating from the nearby site to be migrating beneath the subject property. Based on the ASTM E 2600-10, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the following minimum search distances were initially used to determine if contaminated soil vapors from a nearby known or suspect contaminated site have the potential to be migrating beneath the subject property:

- 1/10 mile (528 feet) for petroleum hydrocarbons
- 1/3 mile (1,760 feet) for other contaminants of concern (COCs)

If up-gradient known or suspect contaminated sites are located within the above referenced distances from the subject property, online resources are reviewed to determine the extent of the contaminated plume at those sites. The following describes search distances for contaminated plumes of petroleum hydrocarbons and other COCs.

Petroleum Hydrocarbons

Based on our review of the EDR report information as indicated above, there are no adjacent or up-gradient known or suspect petroleum hydrocarbon impacted soil or groundwater plumes located within 30 feet of the subject property.

Other COCs

Based on our review of the EDR report, there are no adjacent or up-gradient known or suspect contaminated soil or groundwater plumes located within 100 feet of the subject property.

Review of State of California Division of Oil and Gas Records

A review of the Department of Conservation, Division of Oil, Gas & Geothermal Resources Online Mapping System indicates that no oil wells are located onsite or adjacent to the subject property. One oil and gas well, "Diedrich 1," was depicted as being located within approximately 300 feet to the north of the subject property and was reported to be plugged and abandoned in 1928. Based on its distance from the subject property and plugged/abandoned status, the well is not expected to impact the subject property.

HISTORICAL USE INFORMATION ON THE PROPERTY AND THE ADJOINING PROPERTIES

The historic records review completed for this Phase I ESA includes aerial photographs, topographic maps, fire insurance maps, and city directories as detailed in the following sections. Table 3 provides a summary of the historical use information available for the subject property.

Review of Historic Aerial Photographs

Aerial photographs from EDR's aerial photograph collection were obtained and reviewed. Copies of the aerial photographs are included in Appendix 3 (Historical Documents).

Review of City Directory Listings

EDR was contracted to provide copies of city directory listings for the subject property. A copy of the EDR city directory report is included in Appendix 3. The subject property did not appear to be listed in the city directories reviewed.

Review of Fire Insurance Maps

EDR was contracted to provide copies of fire insurance maps for the subject property. As indicated in the attached report, no maps were available for the subject property or adjacent properties.

Review of Historic Topographic Maps

Historic topographic maps from EDR's map collection were reviewed. Copies of the historic topographic maps are included in Appendix 3.

Review of City of Oxnard Building Permit Records

Based on the fact that the subject property is currently vacant land, building permit records were not reviewed.

Summary of Historic Uses

Subject Property

Based on our review of the documents listed above and summarized in Table 3 below, it appears that the subject property was developed with a ranch and used for agricultural purposes from 1904 to 1989. The subject property has been vacant land from 1994 to the present.

Table 3 - Historical Use of the Subject Property

Year	Use	Source
1904	The subject property is depicted as being developed with a structure.	Topographic Map
1910	The subject property appears to be vacant land; however, the site land use is not discernible due to the small scale of the map.	Topographic Map
1938	The subject property is developed with a ranch, including possibly a residence and several outbuildings (e.g., sheds, garages, or barns). The remainder of the subject property is agricultural (field crops).	Aerial Photograph
1947	Similar to the 1938 aerial photograph.	Aerial Photograph
1947	The subject property is depicted as being developed with two structures.	Topographic Map
1951	The subject property is depicted as being developed with five structures.	Topographic Map
1959	Similar to the 1947 photograph, except that the majority of the subject property around the ranch buildings is used as orchards.	Aerial Photograph
1964	Similar to the 1959 aerial photograph.	Aerial Photograph
1967	Similar to the 1951 topographic map.	Topographic Map
1970	Similar to the 1964 aerial photograph.	Aerial Photograph
1977	Similar to the 1970 aerial photograph.	Aerial Photograph
1989	Similar to the 1977 aerial photograph, except that fewer of the ranch buildings are present at the subject property. The remainder of the subject property is agricultural (fallow or field crops).	Aerial Photograph
1994	The subject property is vacant land with the eastern portions used for parking.	Aerial Photograph
2005	The subject property is vacant land.	Aerial Photograph
2009	Similar to the 2005 aerial photograph.	Aerial Photograph
2010	Similar to the 2009 aerial photograph.	Aerial Photograph
2012	Similar to the 2010 aerial photograph.	Aerial Photograph

Northern Adjacent Property - Highway 101

Based on our review of the historical documents, it appears that the northern adjacent property was developed with Ventura Boulevard, followed by a ranch and agricultural land from 1904 to 1977. From 1989 to the present, this property has been developed with Highway 101, followed by commercial and industrial properties.

Eastern Adjacent Property - 2000 and 2201 Outlet Center Drive

Based on our review of the historical documents, it appears that the eastern adjacent property was vacant or agricultural land in 1904 and 1910, used for agriculture (field crops or orchards) from 1938 to 1989, and developed with a commercial shopping plaza with offices, restaurants, retail stores, medical clinics, and a church from 1994 to the present.

Southern Adjacent Property - 1901 Outlet Center Drive

Based on our review of the historical documents, it appears that the southern adjacent property was vacant or agricultural land in 1904 and 1910, used for agriculture (field crops or orchards) from 1938 to 1989, was vacant land in 1994, and was developed with a commercial structure with medical offices from 2005 to the present.

Western Adjacent Property - 2000 and 2001 Lockwood Street and 1950 Williams Drive

Based on our review of the historical documents, it appears that the western adjacent property (2000 and 2001 Lockwood Street) was vacant or agricultural land in 1904 and 1910, used for agriculture from 1938 to 1994, was developed with a commercial structure in 2005, and was redeveloped with a different commercial structure in 2012. Based on review of city directories, these properties have been occupied by car dealerships since 2003.

The western adjacent property at 1950 Williams Drive was vacant or agricultural land in 1904 and 1910, used for agriculture from 1938 to 1964, and has been developed with a large industrial facility from 1968 to the present. Based on review of city directories, this property has been occupied by industrial facilities since 1970, including Automatic Retailers of America, Becton Dickinson & Co, Falcon Plastics, Teleflex Control Systems, Inc., Telair International, and Ventura Heat Treating.

Gaps in Historical Sources

Several gaps of greater than 5 years were identified in the historical records reviewed, from 1904 to 1910, 1910 to 1938, 1938 to 1947, 1951 to 1959, 1970 to 1977, 1977 to 1989, and 1994 to 2005. These gaps are considered insignificant because the subject property use appears to be similar from 1904 to 1989 (ranch/agricultural) and from 1994 to the present (vacant land).

INTERVIEWS

Rincon Consultants performed interviews regarding the subject property and surrounding areas. The purpose of the interviews was to discuss current and historical subject property conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the property.

Interview with Owner/Site Manager

An interview questionnaire was completed by the property owner representative, Ms. Tanya Reichenbach, Property Manager for Sunbelt Enterprises, LLC, on July 1, 2014. A copy of the completed questionnaire is included in Appendix 1. The following information is based on information obtained during our review of the completed questionnaire.

Ms. Reichenbach indicated the following:

- The subject property is currently, and was previously, vacant land.
- Sunbelt Enterprises LLC is the current owner of the subject property and obtained ownership in approximately 2011.
- The previous owner of the subject property was Fred Kavli dba Sunbelt Properties.

Ms. Reichenbach also provided the following information regarding hazardous material and petroleum hydrocarbon storage and waste generation at the subject property.

- She was not aware of the use or storage of pesticides, oils, solvents, or fuels at the subject property. She indicated that no hazardous wastes are generated at the subject property.
- She was not aware of aboveground or underground storage tanks at the subject property.
- She indicated that a white PVC pipe was present at the subject property but was not aware of the purpose (e.g., trash or a vent).

Ms. Reichenbach also provided the following information regarding hazardous material and petroleum hydrocarbon storage and waste generation at nearby properties.

- The subject property is bordered to the north by Highway 101, to the east by an outlet center, to the south by medical offices and a credit union, and to the west by an auto center.

Ms. Reichenbach indicated that she is not aware of environmental liens or AULs recorded for the subject property, nor of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property. In addition, she is not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Interview with Site Representative

The following information is based on information obtained during the July 10, 2014 site reconnaissance. John Brock of Sunbelt Enterprises, LLC indicated that the subject property is

disked/plowed every year for weed control and fire prevention. He also indicated that he is not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property. In addition, he is not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Interviews with Occupants

The subject property is vacant, undeveloped land, there are no occupants at the site.

Interviews with Local Government Officials

The Ventura County Environmental Health Division (VCEHD) online database¹ was searched for hazardous materials and underground tank listings. The subject property was not listed on databases maintained by the VCEHD.

During the preparation of this Phase I ESA, we reviewed SWRCB online GeoTracker database to determine if the subject property is listed in the database as an unauthorized release site. In addition, we reviewed the DTSC online Envirostor database to determine if the subject property is listed as a hazardous waste permitted facility or cleanup site. Neither the subject property nor adjacent properties were listed on the GeoTracker database. The adjacent property to the west at 1950 Williams Drive was listed in the Envirostor database as Teleflex Control Systems. This property is discussed in the Additional Environmental Records Sources section of this report.

Interviews with Others

Rincon did not attempt to interview neighboring property owners or others as part of this research effort.

SITE RECONNAISSANCE

Rincon Consultants performed a reconnaissance of the subject property on July 10, 2014 accompanied by John Brock with Sunbelt Enterprises, LLC. The purpose of the reconnaissance was to observe existing subject property conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the property.

METHODOLOGY AND LIMITING CONDITIONS

The site reconnaissance was conducted by 1) observing the subject property from public thoroughfares, 2) observing the adjacent properties from public thoroughfares, and 3) observing the subject property from roads and walking paths.

Because of the large size of the subject property, several east-west or north-south walking transects were completed across the subject property.

¹ <http://www.vcenvhealth.org/>

CURRENT USE OF THE PROPERTY AND ADJACENT PROPERTIES

The subject property is currently vacant, unpaved land. Two advertisement billboards were observed on the northern portion of the subject property adjacent to Highway 101. Adjacent businesses include mixed commercial and light industrial uses to the east, south, and west, and US Highway 101 to the north.

PAST USE OF THE PROPERTY AND ADJACENT PROPERTIES

Based on our site reconnaissance, past uses at the subject property and adjacent properties are not readily apparent.

CURRENT OR PAST USES IN THE SURROUNDING AREAS

The subject property is surrounded by commercial land uses as detailed in the Site Description section of this report. Past uses of the surrounding area are not readily apparent based on the site reconnaissance.

GEOLOGIC, HYDROGEOLOGIC, HYDROLOGIC AND TOPOGRAPHIC CONDITIONS

Geologic, hydrogeologic, hydrologic, and topographic information are as previously stated in the Physical Setting Section of this report.

GENERAL DESCRIPTION OF STRUCTURES

The subject property is currently vacant land. No structures were observed during the site reconnaissance.

EXTERIOR OBSERVATIONS

Storage Tanks

Rincon did not observe storage tanks during the site reconnaissance of the subject property.

Drums

No drums were observed during the site reconnaissance of the subject property.

Hazardous Substances and Petroleum Products

No obvious hazardous substances or petroleum products were identified at the subject property.

Unidentified Substance Containers

No unidentified substance containers or unidentified containers that might contain hazardous substances were observed during the site reconnaissance.

Odors

During the site reconnaissance, Rincon did not identify any strong, pungent, or noxious odors.

Pools of Liquid

During the site reconnaissance, Rincon did not identify any pools of liquid including standing surface water. In addition, sumps containing liquids likely to be hazardous substances or petroleum products were not observed.

Indications of Polychlorinated Biphenyls (PCBs)

During the site reconnaissance, no transformers were observed on the subject property.

Other Conditions of Concern

During the site reconnaissance Rincon did not note any of the following interior or exterior observations:

- clarifiers and sumps
- pits, ponds, and lagoons
- stained soil
- stressed vegetation
- waste water
- wells
- septic systems/effluent disposal system

PVC Pipe – Rincon observed what appeared as an approximately 4-inch diameter, vertical PVC pipe filled with concrete within an 8-inch PVC pipe, located on the central-western portion of the subject property. The property owner was not aware of the purpose of the PVC pipe.

Solid Waste/Debris– Rincon observed scattered plastic and paper litter, concrete material, asphalt, glass, household furniture, and clothing and wood debris located throughout the subject property. No obvious evidence of hazardous waste disposal at the subject property was observed. Therefore, the solid waste and debris is considered *de minimis*.

EVALUATION

FINDINGS

Known or suspect environmental conditions associated with the property include the following:

- Historical agricultural land use at the subject property
- PVC pipe on the subject property

OPINIONS

- A. *Historical agricultural land use at the subject property*- Due to the historic use of the subject property for agricultural purposes from approximately 1904 to 1989, there is a potential that soil at the subject property could be impacted with pesticides (e.g., arsenical pesticides, organochlorine pesticides), or other chemicals used routinely in agricultural production. The subject property is currently vacant, unpaved land. Therefore, the historical agricultural land use is considered a potential recognized environmental condition.
- B. *PVC pipe on the subject property* - Rincon observed what appeared as an approximately 4-inch diameter, vertical PVC pipe filled with concrete within an 8-inch PVC pipe, located on the central-western portion of the subject property. The property owner was not aware of the purpose of the PVC pipe. However, no evidence of wells or other subsurface features (e.g., USTs, wastewater disposal) at the subject property was noted during review of other sources consulted for this assessment. Therefore, while the presence of the pipe is likely considered *de minimis*, the purpose of the pipe should be determined.

CONCLUSIONS

Rincon has intended to perform this Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-13 for the property assigned APN 231-009-010-5 in Oxnard, California. This assessment has revealed evidence of one potential recognized environmental condition in connection with the property:

Potential Recognized Environmental Condition:

1. Historical agricultural land use at the subject property

RECOMMENDATIONS

Due to the historic use of the subject property for agricultural purposes, there is a potential that the subject property could be affected with pesticides, or other chemicals used routinely in agricultural production. To determine if pesticides are present in the soil beneath the site we recommend collecting shallow soil samples from the subject property and analyzing these samples for pesticides and arsenic.

The purpose of the PVC pipe at the subject property should be determined.

DEVIATIONS

A lien search was not completed as part of this assessment. No other deviations from ASTM E 1527-13 Practice were encountered during the completion of this Phase I ESA.

SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

The qualified environmental professionals that are responsible for preparing the report include Shannon Phelan, Sarah Larese, and Michael Gialketsis. Their qualifications are summarized in the following section.

"We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

The environmental professionals responsible for conducting this Phase I ESA and preparing the report include Shannon Phelan, Sarah Larese, and Michael Gialketsis. Their qualifications are summarized below.

Environmental Professional Qualifications	X2.1.1 (2) (i) - Professional Engineer or Professional Geologist License or Registration, and 3 years of full-time relevant experience	X2.1.1 (2) (ii) - Licensed or certified by the Federal Government, State, Tribe, or U.S. Territory to perform environmental inquiries	X2.1.1 (2) (iii) – Baccalaureate or Higher Degree from and accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience	X2.1.1 (2) (iii) – Equivalent of 10 years of full-time relevant experience
Michael Gialketsis			BA Environmental Studies	25 years
Sarah Larese			BA Environmental Studies	15 years
Shannon Phelan			BA Environmental Studies	11 years

Michael P. Gialketsis is a Principal and Senior Environmental Planner with Rincon Consultants, Inc. He holds a Bachelor of Arts degree in Environmental Studies from the University of California, Santa Barbara. He has over 20 years of experience as a project manager for environmental assessment projects including Phase I Environmental Site Assessments, permitting and environmental compliance monitoring programs. Mr. Gialketsis has a strong multi-disciplinary background and has been responsible for preparation of several hundred environmental studies within southern California.

Sarah A. Larese is an Associate Environmental Scientist with Rincon Consultants. She holds a Bachelors degree in environmental studies from the University of California, Santa Barbara, California. Ms. Larese has experience in development, implementation and project management of environmental assessment and remediation projects, especially relating to underground storage tanks. Ms. Larese's responsibilities at Rincon include implementation of Phase I and II Environmental Site Assessments as well as conducting site remediation field activities and preparation of environmental reports. She has 15 years of experience conducting research, assessment and remediation projects.

Shannon Phelan is an Environmental Scientist with Rincon Consultants. She holds a Bachelor of Arts degree in environmental studies from University of San Diego, California. Ms. Phelan has 11 years of experience conducting environmental site assessments and related due diligence studies to support real estate transactions, as well as environmental history investigations and corridor and area-wide studies to be included in planning documents for large-scale infrastructural improvements. Ms. Phelan has prepared hundreds of Phase I and Phase II Environmental Site Assessments of a variety of properties on behalf of financial institutions, developers, real estate investors, and local, state, and federal governmental agencies. Ms.

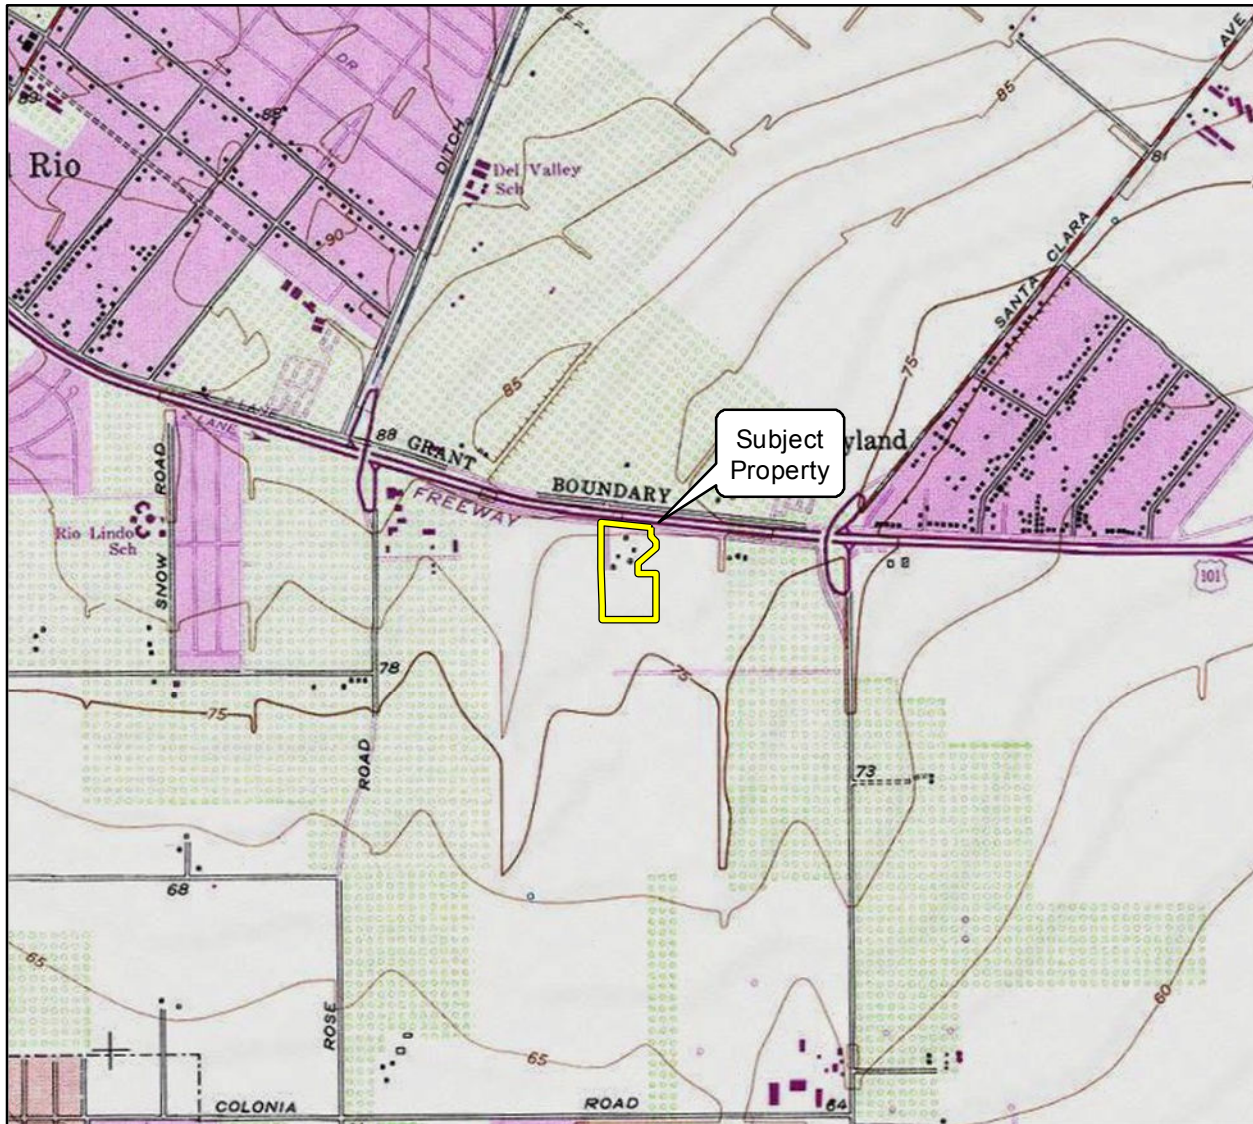

Phelan's experience also includes detailed historical and regulatory research for litigation support.

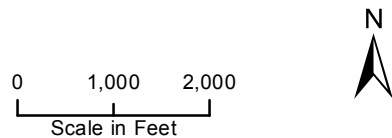

In addition, the following individuals assisted with the report preparation under the supervision of the environmental professionals responsible for conducting this Phase I ESA:

Kristin Roberts is an Environmental Scientist with Rincon Consultants. She holds a Bachelor of Science degree in Soil Science with a concentration in Land Resources from California Polytechnic State University of San Luis Obispo. Ms. Roberts supports and manages SWPPP compliance services and conducts environmental Phase I and Phase II assessments for various project assignments within the Environmental Site Assessment and Remediation Group. Ms. Roberts is a Certified Professional in Erosion and Sediment Control (CPESC #7494) and Qualified SWPPP Practitioner and Developer (QSP/D #24530).

Property Owner Interview Questionnaire

Lockwood Street – APN 213-009-010-5 Oxnard, California

8)	Please indicate the property's current	
	electrical service provider -	SCB
	water service provider -	City of Oxnard
	natural gas service provider -	Southern Cal Gas
	sewer service provider -	City of Oxnard
	solid waste hauler -	City of Oxnard

9)	To the best of your knowledge, has your facility previously or does your facility currently store or use any of the following in individual containers larger than 5 gallons in volume or 50 gallons in the aggregate? (if yes or unknown, include how many, type, and size)	
	<input type="checkbox"/> Damaged or discarded automotive or industrial batteries	NO
	<input type="checkbox"/> Pesticides	NO
	<input type="checkbox"/> Paints	NO
	<input type="checkbox"/> Oils or solvents	NO
	<input type="checkbox"/> Motor vehicle fuel	NO
	<input type="checkbox"/> Pesticides or Herbicides	NO
	<input type="checkbox"/> Other Chemicals or hazardous substances	NO

10)	Please indicate any wastes generated at the facility.		
	Hazardous waste:	Quantity:	Disposal Method:
		N/A	

11)	Are there currently or to the best of your knowledge have there been previously, any industrial drums (typically 55 gallon) or sacks of chemicals located on the property or at the facility?	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input checked="" type="checkbox"/> No	
	<input type="checkbox"/> Unknown	

Property Owner Interview Questionnaire

Lockwood Street – APN 213-009-010-5 Oxnard, California

12)	Are there currently or to the best of your knowledge have there been previously, any evidence of fill dirt having been brought onto the property that originated from a contaminated site or that is of an unknown origin?	
	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe
13)	Are there currently or to the best of your knowledge have there been previously, any pits, ponds or lagoons located on the property in connection with waste treatment or waste disposal?	
	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe
14)	Are there currently or to the best of your knowledge have there been previously, any sumps, clarifiers, or solvent degreasers on the property?	
	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe
15)	Are there currently or to the best of your knowledge have there been previously, any stained soil on the property?	
	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe
16)	Are there currently or to the best of your knowledge have there been previously, any storage tanks (above or below ground) located on the property?	
	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe
17)	Are there currently or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways (etc.) indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	
	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unknown	if Yes or Unknown, please describe <i>There is a white PVC pipe not sure if it is trash or a vent?</i>

Property Owner Interview Questionnaire

Lockwood Street – APN 213-009-010-5 Oxnard, California

18)	If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government agency?	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input checked="" type="checkbox"/> No	
	<input type="checkbox"/> Unknown	
19)	Are there currently or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water, or are emitting foul odors?	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input checked="" type="checkbox"/> No	
	<input type="checkbox"/> Unknown	
20)	To the best of your knowledge has your facility previously or does your facility currently, discharge wastewater on or adjacent to the property other than storm water into a sanitary sewer system?	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input checked="" type="checkbox"/> No	
	<input type="checkbox"/> Unknown	
21)	Have any of the following ever been dumped above grade, buried and/or burned on the property? (please check all that apply and describe if possible)	
	<input type="checkbox"/> hazardous substances	
	<input type="checkbox"/> petroleum products	
	<input type="checkbox"/> unidentified waste materials	
	<input type="checkbox"/> tires	
	<input type="checkbox"/> automotive or industrial batteries	
	<input type="checkbox"/> other waste materials (please describe)	
22)	Are there currently or to the best of your knowledge have there been previously, a transformer, capacitor or any hydraulic equipment on the property?	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input checked="" type="checkbox"/> No	
	<input type="checkbox"/> Unknown	

Property Owner Interview Questionnaire**Lockwood Street – APN 213-009-010-5 Oxnard, California**

23)	Are there currently or to the best of your knowledge have there been previously any records indicating the presence of PCBs?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe
24)	Are there currently or to the best of your knowledge have there been previously any records indicating the presence of pesticides or herbicides?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe
25)	Do you have any knowledge of environmental liens that may have been recorded against the property or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe
26)	Do you have any knowledge of activity and use limitations (AULs) such as engineering controls, deed restrictions, land use restrictions, or institutional controls that may have been recorded against the property?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe
27)	Have you been informed of the past or current existence of hazardous substances, petroleum products, or environmental violations with respect to the property or any facility located on the property?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe
28)	Do you have any knowledge of any environmental site assessments of the property or facility?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unknown	if Yes or Unknown, please describe

Property Owner Interview Questionnaire

Lockwood Street – APN 213-009-010-5 Oxnard, California

29)	Do you know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release of any hazardous substances or petroleum products involving the property by any owner or occupant of the property?	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input checked="" type="checkbox"/> No	
	<input type="checkbox"/> Unknown	

30)	Are there any site-specific geotechnical or geologic reports available for the subject property?	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input type="checkbox"/> No	
	<input checked="" type="checkbox"/> Unknown	

31)	Is there a Title Report available for the subject property?	
	<input type="checkbox"/> Yes	if Yes or Unknown, please describe
	<input checked="" type="checkbox"/> No	
	<input type="checkbox"/> Unknown

Phone Number	805-604-0700
Fax Number	805-485-3899
What is the Preparer's relationship to the property (i.e., owner, occupant, property manager, employee, agent, consultant, etc.) ?	PROPERTY Manager

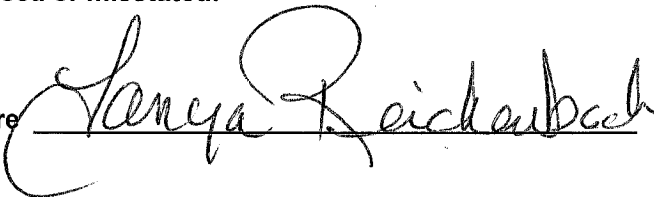

Copies of the completed questionnaire should be faxed, emailed (preferably) or mailed to:

Rincon Consultants, Inc.
180 North Ashwood Avenue
Ventura, CA 93003
Attention: Sarah Larese
Fax: (805) 644-4240
Email: slarese@rinconconsultants.com

Property Owner Interview Questionnaire

Lockwood Street – APN 213-009-010-5 Oxnard, California

Preparer represents that to the best of the preparer's knowledge the above statements and facts are true and correct and to the best of the preparer's knowledge no material facts have been suppressed or misstated.

Signature  Date 7/1/14

User Questionnaire

Lockwood Street – APN 213-009-010-5, Oxnard, California

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

We respectfully request that you fill out this form and e-mail it to Sarah Larese at Slarese@RinconConsultants.com within one week from the date of this transmittal.

1. Why is the Phase I ESA required or being performed?	
2. What type of property transaction is planned? (i.e. sale, purchase, exchange, etc.)	
3. What is the entire site address?	<i>Vacant land -</i>
4. What is the Assessor's Parcel Number (s)?	<i>213-0-090-105</i>
5. Are any considerations beyond the requirements of Practice E1527 to be considered? (i.e. lien search, asbestos & lead based paint, radon, etc.)	<i>NO -</i>
6. Identify all parties who will rely on the Phase I report.	
7. Identify the Site Manager/Contact and how the contact can be reached.	<i>Tanya Reichenbach</i> <i>805-604-0700</i>
8. Identify the Site Owner and how the owner can be reached.	<i>Sunbelt Enterprises</i> <i>LLC</i> <i>805-604-0700</i>

User Questionnaire

Lockwood Street – APN 213-009-010-5, Oxnard, California

<p>9. Do you have copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the any other knowledge or experience with the property that may be pertinent to the environmental professional (i.e. title report, previous Ph I and II ESAs, Environmental Impact Studies, etc.).</p>	<p>NO</p>
---	-----------

1. Did a search of *recorded land title records* (or judicial records, where appropriate) identify any environmental liens filed or recorded against the *property*?

Please checkmark the most appropriate response:

- ☒ I *have not* reviewed the records and *do not know* if there are any filed or recorded environmental liens.
- ☐ I *have* reviewed the records, and *No, there aren't any* filed or recorded environmental liens.
- ☐ I *have* reviewed the records, and *Yes, there are* environmental liens. Explain:

2. Did a search of *recorded land title records* (or judicial records, where appropriate) identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Please checkmark the most appropriate response:

- ☒ I *have not* reviewed the records and *do not know* if there are any filed/recorded AULs or any AULs in place at the site.
- ☐ I *have* reviewed the records, and *No, there aren't any* filed/recorded AULs or any AULs in place at the site.
- ☐ I *have* reviewed the records, and *Yes, there are* AULs filed, recorded, and/or in place at the site. Explain:

3. Does the Title Report provide any information pertaining to environmental cleanup liens or activity and use limitations (AULs) for the subject property?

Please checkmark the most appropriate response:

- ☒ I *have not* reviewed the Title Report and *do not know* if it provides environmental cleanup liens or AULs information.
- ☐ I *have* reviewed the Title Report, and *No, it does not* provide environmental cleanup liens or AULs information.
- ☐ I *have* reviewed the Title Report, and *Yes, it does provide* environmental cleanup liens or AULs information. Explain:

4. Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Please checkmark the most appropriate response:

- ☒ *No*, I *do not* have any specialized knowledge and/or experience related to the property or nearby properties.
- ☐ *Yes*, I *do* have specialized knowledge and/or experience related to the property or nearby properties. Explain:

5. As the user of this ESA, based on your knowledge and experience related to the property, are you aware of any information pertaining to a reduction in value for the subject property relative to any known environmental issues?

Please checkmark the most appropriate response:

- ☒ *No*, I *do not* have any information about a reduction in property value relative to environmental issues.
- ☐ *Yes*, I *do* have information about a reduction in property value relative to environmental issues. Explain:

6. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

Please checkmark the most appropriate response:

- ☐ Yes, I *do* believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Skip to question #7.
- 7 ☒ No, I *do not* believe the purchase price being paid for this property reasonably reflects the fair market value of the property. Proceed to question #6a.

- a. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? (40 CFR 312.29)

Please checkmark the most appropriate response:

- ☐ No, I *have not* considered the idea that known or believed contamination at the site has caused the lower purchase price.
- ☐ Yes, I *have* considered the idea that known or believed contamination at the site has caused the lower purchase price. Explain.

7. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

- a. Do you know the past uses of the property?

- ☒ I *do not* know.
- ☐ I *do* know. Explain:

- b. Do you know of specific chemicals are present or once were present at the property?

- ☒ I *do not* know.
- ☐ I *do* know. Explain:

- c. Do you know of any spills or other chemical releases that have taken place at the property?

- ☒ I *do not* know.
- ☐ I *do* know. Explain:

d. Do you know of any environmental cleanups have taken place at the property?

☒ *I do not know.*

☐ I do know. Explain:

8. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Please checkmark the most appropriate response:

☒ No, I do not know and/or do not have any experience with any obvious indicators that point to the presence or likely presence of contamination at the property.

☐ Yes, I do know of and/or *do have experience with* obvious indicators that point to the presence or likely presence of contamination at the property. Explain:

9. Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site?

☒ *No, I am not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site.*

☐ Yes, I am aware of pending, threatened, or past litigation relevant to hazardous substances or petroleum products, in, on, or from the site. Explain:

10. Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site?

☒ *No, I am not aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site.*

☐ Yes, I am aware of pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site. Explain:

User Questionnaire

Lockwood Street – APN 213-009-010-5, Oxnard, California

11. Are you aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

- ☒ No, I am not aware of any notice from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.
- ☐ Yes, I am aware of a notice, or notices, from a government entity (or multiple government entities) regarding a possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. Explain:

This questionnaire was completed by (please print):

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

<i>TELEFLEX CONTROL SYSTEMS</i>	<i>1950 WILLIAMS DRIVE</i>	<i>SW 0 - 1/8 (0.111 mi.)</i>	<i>C7</i>	<i>29</i>

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/05/2014 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 03/17/2014 has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

CA FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there is 1 CA FID UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
OXNARD TRUCK CENTER	2101 E VENTURA BLVD	NE 0 - 1/8 (0.071 mi.)	B5	21

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there are 3 HIST UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

GIBBS INTERNATIONAL INC.	2201 E VENTURA BLVD	ENE 0 - 1/8 (0.123 mi.)	D10	33

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there is 1 EDR US Hist Auto Stat site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	2001 WILLIAMS DR	SW 1/8 - 1/4 (0.229 mi.)	F18	50

EXECUTIVE SUMMARY

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there is 1 EDR US Hist Cleaners site within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D011
Waste name: SILVER

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

FINDS:

Registry ID: 110012221513

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: 221
Waste name: 221

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D004
Waste name: ARSENIC

Waste code: D006
Waste name: CADMIUM

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F004
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: CRESOLS AND CRESYLIC ACID, AND NITROBENZENE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D027
Waste name: 1,4-DICHLOROBENZENE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: D040
Waste name: TRICHLOROETHYLENE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LUST:

Region: STATE
Global Id: T061119012
Latitude: 34.2193788205971
Longitude: -119.158916473389
Case Type: LUST Cleanup Site
Status: Completed - Case Closed
Status Date: 04/23/2013
Lead Agency: VENTURA COUNTY LOP
Case Worker: EKO
Local Agency: VENTURA COUNTY LOP
RB Case Number: C01024
LOC Case Number: 01024
File Location: Local Agency Warehouse
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Benzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, * * TERT-BUTYL ALCOHOL (TBA), * TERT-BUTYL ALCOHOL (TBA)
Site History: BLANK

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 06/10/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: N/A
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 06/10/2014
Number of Days to Update: 78	Next Scheduled EDR Contact: 07/21/2014
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 05/29/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 09/08/2014
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/08/2013	Telephone: 703-603-8704
Date Made Active in Reports: 12/06/2013	Last EDR Contact: 04/11/2014

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014
Date Made Active in Reports: 04/09/2014

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/11/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2014	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2014	Last EDR Contact: 06/05/2014
Number of Days to Update: 14	Next Scheduled EDR Contact: 09/22/2014
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 05/05/2014

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/04/2014	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/06/2014	Telephone: 202-307-1000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 06/04/2014
Number of Days to Update: 103	Next Scheduled EDR Contact: 09/15/2014
	Data Release Frequency: Quarterly

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 05/05/2014	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 05/06/2014	Telephone: 916-323-3400

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

LOCKWOOD
LOCKWOOD STREET
OXNARD, CA 93036

TARGET PROPERTY COORDINATES

Latitude (North):	34.2219 - 34° 13' 18.84"
Longitude (West):	119.1495 - 119° 8' 58.20"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	301994.3
UTM Y (Meters):	3788654.5
Elevation:	81 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	34119-B2 OXNARD, CA
Most Recent Revision:	1967

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

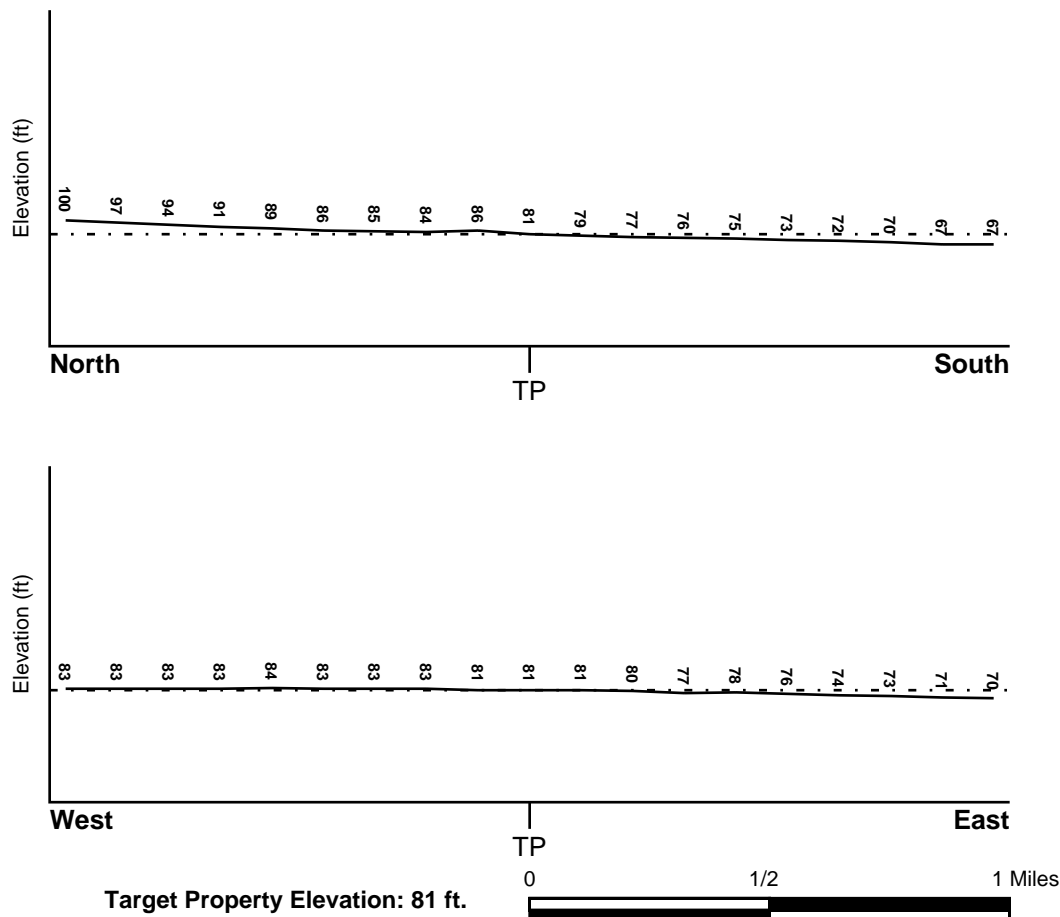

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
VENTURA, CA

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06111C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
OXNARD

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: HUENEME

Soil Surface Texture: loamy sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	16 inches	59 inches	stratified sandy loam to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: CAMARILLO

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	24 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	24 inches	50 inches	stratified sandy loam to sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	50 inches	79 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: PICO

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

1	0 inches	14 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	14 inches	53 inches	stratified sandy loam to loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
3	53 inches	59 inches	stratified gravelly sand to gravelly loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9

Soil Map ID: 4

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	7 inches	59 inches	stratified sand to sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1926 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Rincon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

This Phase I & II Environmental Site Assessment was prepared by Stantec Consulting Services Inc. ("Stantec") for City Ventures Homebuilding LLC (the "Client"). Any reliance on this document by any third party is strictly prohibited. The material in it reflects Stantec's professional judgment in light of the scope, schedule and other limitations stated in the document and in the Master Services Agreement ("MSA") between Stantec and the Client. The opinions in the document are based on conditions and information existing at the time the document was published and do not take into account any subsequent changes.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I ESA have been prepared under the supervision of and reviewed by the professionals whose signatures appear below.

Thomas Stanley,
Geologic Staff

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Summary
December 9, 2020

1.0 SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I & II Environmental Site Assessment (ESA) of the property located south of Lockwood Street and west of Outlet Center Drive, City of Oxnard, County of Ventura, California (the "Property"), on behalf of City Ventures Homebuilding LLC (the "Client").

The Phase I ESA was conducted in conformance with the requirements of American Society for Testing and Materials (ASTM) Designation E 1527-13, and All Appropriate Inquiry (AAI) as defined by the US-EPA in Title 40 of the Code of Federal Regulations, Part 312, except as may have been modified by the scope of work, and the Master Services Agreement between Stantec and Client (the "MSA"). Any exceptions to, or deletions from, the ASTM or AAI practice are described in Section 2.3.

The Property consists of approximately 3.08 acres of undeveloped land. Surrounding properties are a mix of commercial, retail, medical and college properties. A Property location map is illustrated on Figure 1. A Property map illustrating the main features of the Property is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

Based on historical documents including aerial photographs, the Property was formerly used for agricultural purposes (*i.e.*, orchards and cultivating crops) until the early late 1980s or early 1990s. Due to the possible historical use of pesticides and herbicides containing heavy metals (used to prohibit the growth of weeds), Stantec performed a Phase II subsurface investigation to sample and analyze soil for chemical analysis to determine if agricultural chemicals were present at levels that represent a REC or that are of concern to future development.

Stantec advanced six shallow borings to three (3) feet below ground surface (ft bgs) on October 19, 2020 across the Property. Soil samples were collected at the 0.5-1.0-foot interval, 1.5-2.0-feet interval, and the 2.5-3.0-feet interval. The shallow soil sample (0.5-1.0-foot) from the borings were analyzed for organochlorines pesticides (OCPs) by United States Environmental Protection Agency (EPA) test method 8081A and the heavy metals arsenic and lead by US EPA test method 6010B. Stantec believes the scope of work was sufficient for purposes of evaluating the potential impact of historical agricultural use of the Property.

Organochlorine pesticides were detected in four of the six samples analyzed. All detectable concentrations of OCPs were below the respective EPA and Department of Toxic Substances Control (DTSC) residential screening levels. Lead was detected in all six soil samples, but none of the detections exceeded the most-conservative DTSC residential screening levels. Arsenic was detected in all six soil samples at concentrations above the EPA Regional Screening Level (RSL) for residential use (which is typical of soil throughout California, due to naturally-occurring arsenic); however, these concentrations fall within the typical southern California naturally-occurring regional background levels. Based on these results, historical agricultural use does not represent a recognized environmental condition in connection with the Property or a human health risk in contemplation of the proposed residential development of the Property and Stantec recommends no further investigation regarding this issue.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Summary
December 9, 2020

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of the Property. Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property, and Stantec recommends no further investigation regarding the environmental condition of the Property. However, Stantec notes the following *de minimis* condition:

- **Illegally Dumped Waste, Improperly Stored Chemicals and Vehicle.** Stantec identified minor amounts of illegally dumped waste on the Property, particularly along the southern and western Property boundaries. Although there do not appear to be any indications of significant releases of hazardous substances, there is the potential for some amount of hazardous materials to be present amongst the waste. Therefore, the waste should be removed from the Property and disposed of at an appropriately licensed waste receiving facility.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Introduction
December 9, 2020

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform All Appropriate Inquiry (AAI) into the past ownership and uses of the Property consistent with good commercial or customary practice as outlined by the ASTM in “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”, Designation E1527-13. “All Appropriate Inquiry” (AAI) is the process for evaluating a property’s environmental conditions for the purpose of qualifying for landowner liability protections under CERCLA, following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify adverse environmental conditions including recognized environmental conditions (“RECs”) associated with the Property.

The ASTM E1527-13 standard indicates that the purpose of the Phase I ESA is to identify RECs, including historical recognized environmental conditions (“HRECs”), and controlled recognized environmental conditions (“CRECs”) that may exist at a property. The term “recognized environmental conditions” means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

1. Due to any release to the environment.
2. Under conditions indicative of a release to the environment; or
3. Under conditions that pose a material threat of a future release to the environment.

ASTM defines a “HREC” as a REC that has occurred in connection with a property but has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional (EP) must determine whether the past release is a REC when the current Phase I ESA is conducted (e.g., if there has been a change in the regulations). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

ASTM defines a “CREC” as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity and use limitations, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The presence of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. *De minimis* conditions are minor occurrences of contamination that generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Introduction
December 9, 2020

The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or Environmental Professional is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

1. Information that is publicly available.
2. Information that is obtainable from its source within reasonable time and cost constraints; and
3. Information that is practicably reviewable.

2.1 PROPERTY DESCRIPTION

The Property consists of approximately 3.08 acres of undeveloped land in the southwest portion of APN 213-0-090-105. There are currently no structures present at the Property or the wider APN parcel to the east and north, although a road is under construction adjacent to the north of the Property. Surrounding properties are a mix of commercial, medical, and educational properties. A Property location map is illustrated on Figure 1. A Property map illustrating the main features of the Property is provided as Figure 2. Photographs taken during the site reconnaissance visit are provided in Appendix A.

2.2 SPECIAL TERMS, CONDITIONS, AND SIGNIFICANT ASSUMPTIONS

There were no special terms, conditions, or significant assumptions associated with this Phase I ESA.

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with the MSA. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report. This report provides an evaluation of specified environmental conditions associated with the identified property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. 40 CFR 312.20(f)(2) requires that the Environmental Professional evaluate the thoroughness and reliability of provided information. Stantec can neither warrant nor guarantee such thoroughness or reliability, however.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the preparation of this report and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the property's environmental condition. Project Specific limiting conditions are provided in Section 2.2.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Introduction
December 9, 2020

The conclusions are based on the site conditions encountered by Stantec at the time of the work. Accordingly, additional studies and actions may be required. The identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change.

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the MSA, the MSA shall control.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an Environmental Professional (EP). The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in Appendix B.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

User-Provided Information
December 9, 2020

3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 describes responsibilities of the User to complete certain tasks in connection with the performance of "All Appropriate Inquiries" into the Property. The ASTM standard requires that the Environmental Professional request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or de minimis conditions in connection with the Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire and/or Interview	Yes	The user is not aware of any environmental issues associated with the Property. The owner of the Property is identified as Sunbelt Enterprises, LLC.
Environmental Liens or Activity Use Limitations	N/A	No environmental liens or activity and use limitations were identified in the Preliminary Report dated October 23, 2020. A copy of the Preliminary Title Report is provided in Appendix C .
Previous Environmental Permits or Reports Provided by User	Yes	The user provided a previous Phase I Environmental Site Assessment for APN 213-009-010-5, Oxnard, California prepared by Rincon Consultants, Inc dated July 24, 2014.
Purpose of the Phase I ESA	Yes	Due diligence.

Stantec requested information relevant to performance of this Phase I ESA with a written questionnaire submitted to the user of this report. A copy of the User Questionnaire completed by Mr. Lenny Dunn, Consultant for City Ventures, and is provided in **Appendix C**. The significant information provided by Mr. Dunn is summarized below.

1. Information on Environmental Cleanup Liens on the Property? – The Client is not aware of any environmental cleanup liens on the Property.
2. Information on Property Activity or Use Limitations (including Institutional and Engineering Controls)? – The Client is not aware of any activity and land use limitations on the Property.
3. Specialized knowledge or experience of the User - The Client is not aware of historical use of the Property.
4. Commonly known or reasonably ascertainable information about the Property? – None.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

User-Provided Information
December 9, 2020

5. The degree of obviousness or the presence or likely presence of contamination at the Property, and the ability to detect the contamination by appropriate investigation? – None.

A. SPECIALIZED KNOWLEDGE OR EXPERIENCE

The Federal AAI rule (40 CFR §312.28) and ASTM E1527-13 require that all appropriate inquiry must take into account relevant and applicable specialized knowledge and experience on the part of the User regarding the Property, the area surrounding the Property, the conditions of adjoining properties, and any other experience relevant to identifying RECs on the Property.

Mr. Dunn has no knowledge or experience related to the Property or nearby properties.

B. PURCHASE PRICE VS. PROPERTY VALUE

The Federal AAI rule (40 CFR §312.29) and ASTM E1527-13 require that persons seeking a defense to or protection from liability under CERCLA must take into account the relationship of the purchase price to the fair market value of the Property if it were not contaminated to assess whether or not the differential is due to the presence of releases or threatened releases of hazardous substances. This portion of the inquiry is the responsibility of the User, and the User has the option of sharing or not sharing this information with the Environmental Professional performing the Phase I ESA.

Stantec has not performed an independent evaluation of the purchase price of the Property and its relationship to fair market value. Stantec submitted a written questionnaire to the User inquiring about the User's knowledge regarding the relationship of the purchase price to the fair market value of the property if it were not contaminated.

Mr. Dunn believes the purchase price being paid for the Property reasonably reflects the fair market value.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Records Review
December 9, 2020

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the first developed use of the Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below with additional details in the following subsections

Topography:	The Property is located at approximately 75 feet above mean sea level (amsl). The Property topography is relatively flat, and regional topography is to the south-southwest (EDR, 2020).
Soil/Bedrock Data:	Based on observations during shallow soil sampling conducted by Stantec on October 19, 2020, soil beneath the Property was observed to be light brown silty sand to the maximum depth explored of 3 feet below ground surface (ft bgs).
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	According to <i>Monitoring Well Installation & Limited Geoprobe Assessment Report</i> dated November 2008, prepared for the Former Oxnard Truck Center located approximately 1,000 feet northeast of the Property, depth to groundwater is estimated to be approximately 16 ft bgs.
NOTE: Site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

4.1.1 Property Topography and Surface Water Flow

The regional topography in the vicinity of the Property is predominantly flat with a gentle slope to the south-southwest. The Property is located at approximately 75 feet amsl, and is relatively flat (EDR, 2020). Surface water runoff is expected to infiltrate through the unpaved surface of the Property, with excess expected to follow south toward adjacent properties.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Records Review
December 9, 2020

4.1.2 Regional and Property Geology

The Property is located within the Santa Clara River Valley Groundwater Basin (Basin Number 4-004) which underlies a coastal alluvial plain in the southwestern portion of Ventura County. The vicinity of the Property is underlain with Quaternary-aged alluvium deposited by the Santa Ana River.

Based on observations during shallow soil sampling conducted by Stantec on October 19, 2020, soil beneath the Property was observed to be light brown silty sand to approximately 3 ft bgs; the maximum depth explored. According to the *Monitoring Well Installation & Limited Geoprobe Assessment Report*, the subsurface in the vicinity of the Property is described as silty clayey sand with gravel and cobbles from ground surface to 16 feet bgs, underlain by poorly-graded coarse sand to at least 23 ft bgs, in turn locally underlain by silty clay to at least 25 ft bgs.

According to the topographic map, there are no bodies of water within a one-mile radius of the Property.

4.1.3 Regional and Property Hydrogeology

The Property is located within the Santa Clara River Valley Groundwater Basin which is bounded by consolidated rocks exposed on the north in the Ventura Hills; on the east in the Camarillo Hills and Santa Monica Mountains; and on the southwest by the Pacific Ocean. The basin underlies the lower Santa Clara River watershed (DWR, Bulletin 118, February 27, 2004).

According to the *Monitoring Well Installation & Limited Geoprobe Assessment Report* for the Former Oxnard Truck Center located approximately 1,000 feet to the north, depth to groundwater is estimated to be 16 ft bgs, with a likely flow direction toward the Pacific Ocean to the south-southwest.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix D.

Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. As described in 4.1.3, the inferred shallow groundwater flow direction is likely to be to the south-southwest. Observations about the Property and surrounding properties made during the Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Property

The Property was not identified in the environmental database report

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Records Review
December 9, 2020

4.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions on adjacent and nearby sites to pose a REC, CREC, or HREC for the Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Property from a nearby property, including by vapor migration or encroachment (i.e., potential for a vapor encroachment condition [VEC].

Based on this evaluation, the following individual facilities were identified as the most likely potential sources of impact to the Property. The basis for why each of the following listed databases creates a REC for the property is also provided.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
CARMAX #6014 2001 Lockwood Street Oxnard, CA 93036	RCRA-SQG, HWTS, CERS HAZ WASTE, CERS TANKS, HAZNET, CERS, AST, UST	350 feet / northwest	No
Despite the facility being listed as a waste producer and maintaining above ground and underground storage tanks (ASTs/USTs), the absence of recorded releases or violations mean that the facility is not considered an environmental concern to the Property.			
7-Eleven Inc. #33399 2201 East Gonzales Road Oxnard, CA 93036	UST, CERS HAZ WASTE, CERS TANKS, CIWQS, CERS, RCRA NONGEN/NLR	350 feet / southeast	No
The gas station facility received multiple CERS notices of violation including failure to maintain secondary containment testing and failure to maintain a current UST Response Plan. The facility returned to compliance on these issues and as of the most recent CERS inspection in September 2019, there are no outstanding violations. Based upon the absence of recorded releases or outstanding violations, the distance and downgradient position of the site, the facility is not considered an environmental concern to the Property.			
Costco Wholesale No 420 2001 East Ventura Boulevard Oxnard, CA 93036	HWTS, RCRA- LQG, ENVIROSTOR, FINDS, ECHO, HAZNET, MED WASTE, VENTURA CERS	750 feet / north	No
The facility is listed as a producer of large quantities of waste including medical waste and hazardous materials including solvents and hydrocarbons. Based upon the absence of recorded releases or outstanding violations, the facility is not considered an environmental concern to the Property.			

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Records Review
December 9, 2020

Oxnard Truck Center / Power Equipment Services 2101 East Ventura Boulevard Oxnard, CA 93036	RCRA-SQG, LUST, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, VENTURA CO. BWT, CORTESE, HIST CORTESE	750 feet / north	No
<p>A former leaking underground storage tank (UST) case is located at the facility. Information on the State Water Resources Control Board (SWRCB) GeoTracker database indicates that the facility formerly possessed two 12,000-gallon diesel USTs, one 12,000-gallon unleaded gasoline UST, two 8,000-gallon oil USTs and one 2,000-gallon waste oil UST. A diesel release was discovered in 1987 and a waste oil release was identified in 1998. All underground tanks were removed between 2000 and 2003 and replaced by two 500-gallon diesel and two 500-gallon waste oil above-ground storage tanks (ASTs).</p> <p>It is understood that the release of waste oil was assessed and remediated between 1999 and 2002, although evidence of case closure has not been identified by Stantec amongst the records included in the EDR report or available on the GeoTracker database.</p> <p>Assessment and remediation of the diesel release was initially discontinued under the approval of Ventura County Environmental Health Department (VCEHD) in 1999, with associated monitoring wells subsequently abandoned in 2000. Following the removal of the USTs in 2003, additional assessment around the former USTs was undertaken comprising the installation of six additional wells to monitor the extent of the diesel plume around the former UST cavity and as perimeter monitoring wells. All wells were abandoned in 2009, with a Remedial Action Completion Certification letter issued by the Resource Management Agency of the County of Ventura.</p> <p>Due to the closure of the former LUST cases at the facility, time since closure, and distance from the Property, the facility is not considered an environmental concern to the Property.</p>			
Teleflex Control Systems 1950 Williams Drive Oxnard, CA 93036	ENVIROSTOR	1,000 feet / west-southwest	No
<p>The facility is reported to have supported ASTs containing chromate-containing materials between 1968 and 1986 used in the manufacture of medical products. 'Blooms' of a mustard yellow substance began appearing on basement walls and floors at the facility in 1991. The last known occurrence of the blooms was 1998, although site assessment was undertaken in 2006, 2010 and 2011.</p> <p>The facility was designated as No Further Remedial Action Required by the US Environmental Protection Agency (EPA) in January 2013, followed by Department of Toxic Substances Control (DTSC) in June 2013.</p> <p>Based on the position of the facility downgradient of the Property, the fact that the site received No Further Remedial Action Required status, the facility is not considered an environmental concern to the Property.</p>			

The remaining listings in the database search report provided in Appendix D do not constitute a potential REC for the Property, based on a combination of factors such as distance from the Property, position with relation to likely hydraulic and topographic gradients, and significance of release(s).

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Records Review
December 9, 2020

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of RECs in connection with the Property:

4.3.1 Local Building and/or Planning Department Records

Agency Name, Contact Information	Findings
City of Oxnard Clerk 300 West Third Street, Fourth Floor Oxnard, CA 93030 Phone: (805) 385-7803 Date of contact: 11/24/2020	Stantec submitted a request to the City of Oxnard Clerk to research whether any documents were on file for the Property. As of the writing of this report, a response had not yet been received. Should records become available that affect the conclusions and recommendations in this report, Stantec will issue an addendum to the report. However, based on its review of other sources, Stantec considers it unlikely that any records from this agency would alter the conclusions or recommendations of this report. The lack of this information does not represent a significant data gap.

4.3.2 Local Health Department

Agency Name Contact Information	Finding
County of Ventura Resource Management Agency (VCRMA) 800 South Victoria Avenue Ventura, CA 93009 Phone: (805) 654-2494 Accessed: 11/24/2020	Stantec reviewed the online records databases maintained by VCRMA and did not identify records pertaining to the subject Property. The databases reviewed include: <ul style="list-style-type: none">Leaking Underground Fuel Tanks (LUFT) and Voluntary Cleanup Program (VCP)Hazardous Materials Program and Underground Tanks (CUPA)Underground Tanks – Inactive The absence of records is reflective of the limited development history of the Property.

4.3.3 California Geologic Energy Management Division (CalGEM)

Agency Name Contact Information	Finding
California Geologic Energy Management Division (CalGEM)	Stantec reviewed information on the CalGEM Well Finder database to determine the proximity of oil and gas wells in

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Records Review
December 9, 2020

Agency Name Contact Information	Finding
Online: https://maps.conservation.ca.gov/doggr/wellfinder/ Accessed: 11/24/2020	the vicinity of the Property. There are no oil wells within the Property boundaries. According to the database, the closest oil well is located approximately 725 feet to the north of the Property. This well is a plugged dry hole identified with American Petroleum Institute (API) number 0411105772, operated by Shell Western E&P Inc.

4.3.4 Department of Toxic Substances Control

Agency Name Contact Information	Finding
Department of Toxic Substances Control 5796 Corporate Avenue Cypress, CA 90630-4732 Phone: 714-484-5300 Online database: http://www.envirostor.dtsc.ca.gov/public/ Accessed: 11/24/2020	No records for the Property address, or the adjoining properties were listed on the DTSC's online database Envirostor.

4.3.5 Fire Department

Agency Name Contact Information	Finding
Ventura County Fire Department 165 Durley Avenue Camarillo Phone: (805) 383-4718 Date of contact: 11/24/2020	A request for public records was submitted to the Ventura County Fire Department on November 24, 2020. A response received on November 30, 2020 indicates that the Fire Department did not identify records for the Property, including no plans or drawings and no exempt records.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Records Review
December 9, 2020

4.3.6 Regional Water Quality Control Board

Agency Name Contact Information	Finding
Regional Water Quality Control Board, Santa Ana Region, Region 8 3737 Main Street, Suite 500 Riverside, CA 92501 Phone: 951-782-4130 Online database: http://geotracker.waterboards.ca.gov/ Accessed: 11/24/2020	Stantec searched the RWQCB's online database Geotracker, and no files exist for the Property addresses.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

No environmental liens or activity and use limitations were identified in the Preliminary Report dated June 24, 2020. A copy of the Preliminary Title Report is provided in Appendix C. No additional land title records, deeds, environmental liens, and activity and use limitation documentation were provided by the User, and public records were not searched by Stantec.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs.

Year	Scale	Observations, Property and Adjoining Properties
1927, 1938	1" =500'	The Property predominantly comprises undeveloped land, with a small building present encroaching upon the northern portion of the Property, associated with a development extending off-site to the north. The surrounding land to the east, south and west comprises undeveloped land. Orchards bound the parcel which encompasses the Property to the east and west and beyond a road (future Highway 101) to the north.
1947	1" =500'	The building in the northern portion of the Property is no longer present. The Property and adjacent land to the east and south has been plowed and is in use for cultivation.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Records Review
December 9, 2020

Year	Scale	Observations, Property and Adjoining Properties
1953, 1959, 1967	1" =500'	<p>Up to three small buildings have been constructed encroaching upon the northwestern portion of the Property, extending off-site to the north. The central and southern portions of the Property remain in agricultural use, becoming planted as an orchard by 1959.</p> <p>There are no significant changes to the immediately surrounding land use, although parcels located approximately 1,000 feet northeast and west of the Property have been developed into potential residential and industrial land uses by 1967.</p>
1978, 1985	1" =500'	<p>The Property is no longer in use as an orchard but appears to remain in agricultural use.</p> <p>The parcel adjacent to the southwest has been developed into a large, presumed industrial building with associated paved parking lots. By 1985, the several of the buildings adjacent to the north of Property have been demolished. Additional development is evident in the wider surrounding area.</p>
1994	1" =500'	<p>All buildings encroaching upon the northern Property boundary and extending off-site to the north have been demolished. The Property appears to comprise unused, undeveloped land. Two heavy goods vehicles (HGVs) appear to be parked in the eastern portion of the Property. The parcel approximately 400 feet to the east of the Property has been developed into a commercial complex with associated parking lots. The parcel adjacent to the east of the Property is unpaved but is used for vehicle parking.</p>
2005, 2009, 2012, 2016	1" =500'	<p>Color photography from 2005 indicates the Property comprises undeveloped rough ground populated by grasses and small shrubs. Paths are worn in trackways cutting across the northern, eastern and southern portions of the Property.</p> <p>The parcel adjacent to the south has been developed into commercial use. Lockwood Street has been laid adjacent to the northwest, with commercial properties constructed on the parcels to the north and south. Significant development has occurred in the wider area, comprising predominantly commercial development to the north of Highway 101 and predominantly residential housing in the area to the south of the Property.</p> <p>There are no significant changes to the Property over subsequent photographs. Development continues in the surrounding area, but the parcels immediately adjacent to the east and north remain undeveloped to the present.</p>

Name of aerial photograph source: EDR, 2020

Based on review of aerial photographs, the Property was formerly used for agricultural purposes (i.e. orchards and crop cultivation) until the late 1980s or early 1990s. The Property appears to have remained vacant since at least 1994. Accordingly, collected soil samples for chemical analysis to determine if pesticides and heavy metals associated with herbicides were present at levels that represent a Recognized Environmental Condition (REC) or that are of concern to residential development. Results of this investigation are provided in Section 6.0. Stantec concluded based on the completed soil sampling that

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Records Review
December 9, 2020

the historical agricultural use of the Property does not represent a REC and recommends no further investigation regarding this issue.

4.4.3 City Directories

Stantec retained a third party to research available reverse city directories for the Property, in approximately five-year intervals.

The following is a summary of pertinent entries identified during Stantec's review of the city directory listings:

Subject/Adjoining Property	Year	Listed Occupants
Adjacent northwest: 2001 Lockwood Street	2009 - 2017	Motorcycles 101 Inc. Cars 101 Carmax
Adjacent south: 1901 Outlet Center Drive	1999 - 2017	Various Medical Offices
Adjacent east: 2000 Outlet Center Drive	1996 - 2017	Various commercial properties including clothing and footwear shops, furniture shops and homeware shops California Lutheran University
Adjacent northeast: 2100 Outlet Center Drive	1996 - 2017	Various commercial properties including clothing and footwear shops, furniture shops and homeware shops
Adjacent northeast: 2201 Outlet Center Drive	1996 - 2017	Bugle Boy Factory Stores California Lutheran University

Name of city directories and source: EDR, 2020

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Property uses.

Stantec requested fire insurance maps from EDR; however, no coverage exists for the Property. The Sanborn® Map Search Report indicating "no coverage" is presented in Appendix E.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Records Review
December 9, 2020

4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-minute Topographic Maps of the Oxnard, Camarillo, and Hueneme, California Quadrangles (scales of 1:24,000, 1:50,000 and 1:62,500) to help identify past Property usage and areas of potential environmental concern. Copies of the historical maps are provided in Appendix E. The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations, Property and Adjoining Properties
1904	1:62,500	The Property comprises undeveloped land. A highway is present to the north (Highway 101) and a track is present to the west with a small development adjacent to the southeast of the Property.
1943, 1947, 1949, 1950, 1951, 1967	1:62,500 1:50,000 1:24,000	The Property remains undeveloped, although a building is present adjacent to the northeastern Property boundary. The track to the west is no longer present, but instead a track to the north serves the building adjacent to the north of the Property. Additional buildings are constructed to the north by 1950.
2012	1:24,000	The Property remains undeveloped. The former buildings to the north of the Property are no longer present. The surrounding area has undergone significant development. Lockwood Street is annotated adjacent to the northwest of the Property.

Name of maps and source: EDR, 2020

4.4.6 Other Historical Sources

No other historical sources were researched.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Site Reconnaissance
December 9, 2020

5.0 SITE RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Mr. Thomas Stanley, Geologic Staff with Stantec, on October 19, 2020. Access to the Property was provided by Mr. Lenny Dunn of Point View Land Consulting, a representative of the Property Owner. Stantec was unaccompanied during the Property visit. Figure 2 provides information about the Property and adjoining properties and the location of potential areas of environmental concern. Photographs collected during the Property visit are included in Appendix A.

5.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Property that may indicate the presence of RECs. The reconnaissance of the Property was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Property boundary.
- Traverse transects across the Property.

Weather conditions during the visit to the Property were clear and sunny. There were no weather-related Property access restrictions encountered during the reconnaissance visit.

5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property is located southeast of Lockwood Street and west of Outlet Center Drive, in the City of Oxnard, County of Ventura, California. The surrounding area consists of a mixture of commercial, retail, and education properties, with vacant land adjacent to the east and north.
Property Operations.	The Property is unoccupied and undeveloped.
Structures, Roads, Other Improvements:	None, although a road and utilities were being constructed parallel to the northern Property boundary at the time of the visit.
Property Size (acres):	3.08 acres.
Estimated % of Property Covered by Buildings and/or Pavement:	0%
Observed Current Property Use/Operations:	None observed.
Observed Evidence of Past Property Use(s):	None observed.
Sewage Disposal Method (and age):	None observed.
Potable Water Source:	None observed.
Electric Utility:	None observed.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Site Reconnaissance
December 9, 2020

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	None observed.
Drums (≥ 5 gallons):	None observed.
Strong, Pungent, or Noxious Odors:	None observed.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
PCB-Containing Equipment:	None observed.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	<p>PVC piping and a cardboard box containing full and partially empty slightly rusted metal cans of solvent cement were identified in the northern portion of the Property. No evidence of spills or leakage was noted.</p> <p>A tractor was present in the southern portion of the Property. Whilst no evidence of fuel or oil leaks was noted, the vehicle has the potential to develop leaks when left exposed to wind and rain.</p>

5.4 INTERIOR OBSERVATIONS

As there were no structures present at the time of the reconnaissance visit, no interior observations were made by Stantec.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the site reconnaissance of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-site Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	None observed.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	Minor amounts of discarded and dumped waste were noted adjacent to the southern and western Property boundaries. Waste predominantly comprised inert materials such as plastic packaging, concrete, and shopping carts.
Solid Waste Disposal:	None observed.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Site Reconnaissance
December 9, 2020

Observations	Description
Potential Areas of Fill Placement:	A stockpile of soil covered with black plastic sheeting was observed along the length of the western Property boundary. Soil was noted to comprise orangish brown poorly graded fine to medium sand and appeared to be used during the ongoing road construction works. No visual or olfactory evidence of contamination was noted, nor was evidence of deleterious materials encountered.
Wastewater:	No exterior wastewater discharge was observed.
Stormwater:	No stormwater discharge was observed.
Wells:	No wells were observed.
Septic Systems:	No visible evidence of the existence of a septic system was observed.
Other Exterior Observations:	None.

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the site reconnaissance.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA for the Property.
Other Underground Structures:	None observed.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of ASTs, was discovered during the site reconnaissance.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining properties:

NORTH	A recently laid road with ongoing utility placement works noted during the visit, with undeveloped land beyond.
EAST	Vacant land with Outlet Center Drive and commercial retail units beyond.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Site Reconnaissance
December 9, 2020

SOUTH	A medical center with associated paved parking lot.
WEST	Vehicle storage lot associated with a nearby car sales facility.

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining properties providing indications of past use and activities, if any, are described below.

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds, and lagoons on adjoining properties:

NORTH	None observed.
EAST	None observed.
SOUTH	None observed.
WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	The Property is relatively flat.
---	----------------------------------

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Shallow Soil Sampling
December 9, 2020

6.0 SHALLOW SOIL SAMPLING

Based on historical documents including aerial photographs, the Property was formerly used for agricultural purposes (i.e. orchards and crop cultivation) until the late 1980s or early 1990s. The historical use of the Property for agricultural purposes can be a potential concern due to the possible use of pesticides and herbicides containing heavy metals used to prohibit the growth of weeds. Based on this history, Stantec performed a Phase II ESA to evaluate if there was a concern to the Site.

Stantec advanced six shallow borings to 3 ft bgs on October 19, 2020. Soil samples were collected at the 0.5-1.0-foot interval, 1.5-2.0-foot interval, and the 2.5-3.0-foot interval. The shallow soil sample (0.5-1.0-foot) from the borings were analyzed for organochlorines pesticides (OCPs) by United States Environmental Protection Agency (EPA) test method 8081A and the metals arsenic and lead by EPA test method 6010B.

The analytical results are compared against EPA Regional Screening Levels and Department of Toxic Substances Control (DTSC) Human and Ecological Risk Office (HERO) Residential Screening Levels in Table 1. Residential rather than commercial screening levels have been selected as a most-sensitive end use for comparison purposes only. The certified laboratory analytical report is provided in Appendix F.

Organochlorine Pesticides

At least two OCP chemicals (of 4,4'-DDE, 4,4'-DDT, alpha chlordane, gamma chlordane, and dieldrin) was detected in soil samples from locations SB-1 to SB-3 and SB-6. The highest concentrations of 4,4'-DDE, 4,4'-DDT, alpha chlordane, gamma chlordane was reported in the sample from SB-1. Dieldrin was detected in the sample from SB-6 only. No concentrations of OCPs were reported above the respective laboratory method detection limit in samples from SB-4 and SB-5.

No concentrations of OCPs were reported exceeding the respective screening level for residential use maintained by the EPA or DTSC.

Heavy Metals

Concentrations of arsenic and lead were reported above the laboratory method detection limit in all six samples. The concentrations of lead reported range from 3.4 milligrams per kilogram (mg/kg) to 11 mg/kg, but none exceed the EPA screening level (400 mg/kg) or DTSC screening level (80 mg/kg) for residential use.

Concentrations of arsenic ranged from 2.2 mg/kg to 3.3 mg/kg, which exceeds both of the screening levels for arsenic maintained by the EPA (0.68 mg/kg) and DTSC (0.11 mg/kg). However, all concentrations were within typical and naturally-occurring southern California background concentrations of arsenic (defined as concentrations of up to 15.2 mg/kg; EPA 1992).

Stantec concludes that the historical agricultural use of the Property represents neither a Recognized Environmental Condition nor a human health risk in contemplation of the proposed residential development of the Property and recommends no further investigation regarding this issue.

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Evaluation
December 9, 2020

7.0 EVALUATION

This section provides a summary overview of Findings, Opinions, and Conclusions.

7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and a property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions.

- Based on historical documents including aerial photographs, the Property was formerly used for agricultural purposes (i.e. orchards and cultivating crops) until the early late 1980s or early 1990s. Accordingly, Stantec collected soil samples for chemical analysis to determine if pesticides and heavy metals associated with herbicides were present at levels that represent a concern to residential development of the Site.

Stantec advanced six shallow borings to 3 ft bgs on October 19, 2020. Organochlorine pesticides were detected in four of the six samples analyzed and comprised 4,4'-DDE, 4,4'-DDT, alpha- and gamma-Chlordane, and Dieldrin. All detectable concentrations of OCPs were below the respective EPA and DTSC HERO residential screening levels. Lead was detected in all six soil samples with concentrations ranging from 3.4 to 11 mg/kg. All of the detections are below the DTSC HERO residential screening level of 80 mg/kg for lead. Arsenic was detected in all six soil samples with concentrations ranging from 2.2 to 3.3 mg/kg, which are above the EPA RSL for residential use of 0.68 mg/kg; however, these concentrations fall within the typical southern California regional background levels of up to 15.2 mg/kg.

Based on these results, historical agricultural use does not represent a recognized environmental condition or a human health risk in context of the proposed development of the Property, and Stantec recommends no further investigation regarding this issue.

- An environmental records search was performed and identified sites within their respective ASTM E 1527-13 search radii of the Property that may represent RECs, HRECs, or *de minimis* conditions.

Based on one or more of the following reasons: distance from the Property, position of sites with respect to assumed groundwater flow direction, the native soils, and regulatory status, none of the sites identified in the environmental records search report are expected to affect soil or groundwater quality at the Property. The environmental records search identified no RECs, HRECs or *de minimis* conditions at or near the Property.

- During a site reconnaissance visit, potential sources of contamination such as dumped waste, improperly stored cans of solvent cement and a tractor parked on bare soil with no drip tray were noted.

The waste, cans of solvent cement and tractor stored over bare soil are not considered a REC to the Property. They do, however, represent a *de minimis condition* and action should be taken to remove the waste, remove the cans of solvent cement or store in a lidded, impermeable container, and remove

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Evaluation
December 9, 2020

the tractor or place a drip tray beneath the engine and any other parts with the potential to leak fuel, oil or fluids. Otherwise, Stantec recommends no further investigation regarding this issue.

7.2 DATA GAPS

The federal AAI final rule [40 CFR 312.10(a)] and ASTM E1527-13 identify a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the Environmental Professional or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 1.4:	None.
Weather-Related Restrictions to Site Reconnaissance:	None.
Facility Access Restrictions to Site Reconnaissance:	None.
Other Site Reconnaissance Restrictions:	None.
Data Gaps from Environmental Records Review:	None.
Data Gaps from Historical Records Review:	None.
Data Gaps from Interviews:	No interviews were conducted as part of this Phase I ESA. The lack of interview is not considered a significant data gap.
Other Data Gaps:	None.

7.3 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of the Property. Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property, and Stantec recommends no further investigation regarding the environmental condition of the Property. However, Stantec notes the following *de minimis* condition:

- **Illegally Dumped Waste, Improperly Stored Chemicals and Vehicle.** Stantec identified minor amounts of illegally dumped waste on the Property, particularly along the southern and western Property boundaries. Although there do not appear to be any indications of significant releases of hazardous substances, there is the potential for some amount of hazardous materials to be present amongst the waste. Therefore, the waste

PHASE I & II ENVIRONMENTAL SITE ASSESSMENT

Evaluation
December 9, 2020

should be removed from the Property and disposed of at an appropriately licensed waste receiving facility.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

Subject: Dear Soil Assessment Report for the Outlet Center, Oxnard, California

Mr. Comanor:

We are pleased to submit this Soil Assessment Report for the property located on Lockwood Street identified by Assessor Parcel Number (APN) 213-009-010-5 in Oxnard, California (site). The soil assessment was performed in accordance with our proposal dated February 27, 2020. The objective of the assessment was to evaluate potential contamination of the onsite soil.

Thank you for selecting Rincon for this project. If you have any questions, or if we can be of any future assistance, please contact us.

Sincerely,

Rincon Consultants, Inc.

Meghan Hearne-Williams

Appendices

Appendix A Analytical Laboratory Report

Executive Summary

This report presents the results of a soil assessment conducted at the property located on Lockwood Street identified by Assessor Parcel Number (APN) 213-009-010-5 in Oxnard, California (site). The soil assessment was performed in accordance with our proposal dated February 27, 2020. The objective of the assessment was to evaluate potential contamination of the onsite soil associated with historical agricultural land use.

On December 29, 2020, Rincon advanced eight hand auger soil borings at the site to a total depth of approximately 3.0 feet below ground surface (bgs). Soil matrix samples were collected at 0.0-0.5 feet bgs (surface) and from 2.5-3.0 feet bgs. A total of 16 soil samples were collected. Initially, only the eight shallow soil samples (0.0-0.5 feet bgs) were analyzed for organochlorine pesticides (OCPs) by EPA Method 8081A and arsenic by EPA Method 6010B/7471A. The deeper samples were kept on hold at the analytical laboratory, pending the results of the shallow samples.

It is Rincon's understanding that the development of the property will be for commercial land use. However, to be protective of human health, the soil matrix analytical results were compared to the San Francisco Bay Regional Water Quality Control Board (SFB RWQCB) Environmental Screening Levels (ESLs) for residential, commercial, and construction worker soil exposure scenarios, (SFB RWQCB 2019) (hereinafter referred to as ESLs). In addition, metals were compared to the California Background Concentrations published by the Kearney Foundation (March 1996), which establishes typical background concentration ranges for metals in California soil.

The following pesticides were detected above laboratory reporting limits in the shallow (0.0-0.5 foot bgs) soil matrix samples: 4,4-Dichlorodiphenyldichloroethane (4,4-DDD), 4,4-Dichlorodiphenyldichloroethylene (4,4-DDE), and 4,4-Dichlorodiphenyltrichloroethane (4,4-DDT). However, none of the concentrations detected were above the SFB RWQCB residential, commercial, and construction worker ESLs. No other pesticides were detected above the laboratory detection limits. Since the results of the shallow soil samples were below ESLs, the soil matrix samples collected from 2.5-3.0 feet bgs were not analyzed.

Concentrations of arsenic ranged from 2.9 milligrams per kilograms (mg/kg) in the soil sample collected from RB3 at 0.0-0.5 feet bgs to 4.8 mg/kg in the soil sample collected from RB1 at 0.0-0.5 feet bgs. Although the levels of arsenic exceeded the residential, commercial, and construction worker exposure ESLs established for arsenic, the concentrations reported are within the accepted California background concentration range published by the Kearney Foundation (0.6 mg/kg to 11 mg/kg). Based on the results of this Soil Assessment:

- Concentrations of OCPs in shallow soil were below both the residential, commercial, and construction worker exposure ESLs. Therefore, no further assessment of OCPs in onsite soil is recommended.
- The concentrations of arsenic reported in the soil samples were within the within the accepted California background concentration range published by the Kearney Foundation. Based on the concentrations reported for arsenic in the shallow soil samples, no further assessment is recommended.

Introduction

On behalf of Sunbelt Enterprises, Rincon Consultants, Inc. (Rincon) has prepared this Soil Assessment Report for the property located on Lockwood Street and identified by Assessor Parcel Number (APN) 213-009-010-5 in Oxnard, California (site). Rincon performed a soil assessment at the site to evaluate if the site has been impacted with organochlorine pesticides (OCPs) and arsenic as a result of historical agricultural land use.

Purpose and Scope

The purpose of the Soil Assessment was to determine the absence or presence of agricultural chemicals and arsenic that could affect site occupants or construction/utility worker safety. Our scope of work included the following:

- Preparation of a site health and safety plan in accordance with Occupational Safety and Health Administration (OSHA) requirements.
- Notification of Underground Service Alert (USA) utility marking service, as required by California law. The utility markings identified known utility locations in the public right of way.
- Advancement of eight soil borings to a depth of 3.0 feet below ground surface (bgs) for the purpose of collecting soil samples.
- Collection of soil matrix samples from each of the eight borings at depth intervals of 0.0-0.5 feet bgs (surface) and 2.5-3.0 feet bgs.
- Analysis of eight soil samples for OCPs by EPA Method 8081A and arsenic by EPA Method 6010B/7471A (initially, only the samples collected from 0.0 to 0.5 feet bgs were analyzed; the deeper samples were placed on hold with the laboratory, pending results of the shallow sample).
- Preparation of this report documenting our findings.

Screening Levels

It is Rincon's understanding that the redevelopment of the property will be for commercial land use. To be protective of human health, soil analytical results were compared to screening levels established for both residential and commercial land use. The following sources were reviewed to select appropriate screening levels for constituents of concern detected in soil samples during this site assessment (Table 1):

- San Francisco Bay Regional Water Quality Control Board (SFB RWQCB) Environmental Screening Levels (ESLs) for residential, commercial, and construction worker soil exposure scenarios, (SFB RWQCB 2019) (hereinafter referred to as ESLs).
- In addition, metals were compared to the California Background Concentrations published by the Kearney Foundation (March 1996), which establishes typical background concentration ranges for metals in California soil.

Methodology

Soil Sampling Methodology

On December 29, 2020, Rincon advanced eight soil borings at the site. The boring locations are depicted on Figure 2. Soil encountered during sampling generally consisted of a dark brown sand from surface to approximately 2.5 feet bgs, which became lighter brown in color with depth. No odors or discoloration were noted.

A total of eight soil borings (RB1 through RB8) were advanced throughout the site to a depth of 3.0 feet bgs. Discrete soil matrix samples were collected at 0.0-0.5 feet bgs (surface) and 2.5-3.0 feet bgs. Initially, only the surface samples were analyzed for OCPs (EPA Method 8081A) and arsenic (EPA Method 6010B). The 2.5-3.0-foot-deep soil matrix samples were held at the laboratory, pending the results of the shallower samples. These samples would only be analyzed if the shallower samples had detected concentrations of contaminants above the ESLs. However, since the results of the shallow soil samples were below ESLs for OCPs and within the acceptable range of arsenic concentrations in California soil, the deeper samples were not analyzed.

Soil sampling was conducted using a stainless-steel hand auger. When the target sampling depth was reached, soil matrix samples were collected in 8-ounce glass jars with Teflon-lined lids, provided by the analytical laboratory. The samples were sealed, the label was applied, and the samples were stored on ice and in a cooler chilled to 4 degrees Celsius. The soil samples were couriered BC Laboratories, Inc. under chain of custody protocol.

Decontamination of reusable sampling equipment was completed between each soil boring and each specific depth interval. Equipment decontaminated included the hand auger, hand tools, and all other equipment that contacted the soil during sampling activities. The sampling equipment was washed in clean 5-gallon buckets using a phosphate-free detergent with a final rinse using distilled water. Soil cuttings were used as backfill in the soil borings.

All sampling and reporting were completed under the direct supervision of a California Professional Geologist.

Laboratory Analytical QA/QC

BC Laboratories, Inc. performed Tier II data validation documenting the quality assurance/quality control (QA/QC) measures employed during laboratory analysis of groundwater and soil vapor samples. The data quality review ensured that data quality objectives were met for each of the following quality control measures:

- Data completeness
- Holding times and preservation
- Laboratory blanks
- Laboratory control standards
- Sample duplicate
- Matrix spike/matrix spike duplicates
- Compound identification and quantitation

Overall, the QA/QC measures met BC Laboratories' data quality objectives, as described in the analytical reports provided in Appendix A.

Analytical Results

The laboratory analytical results are summarized in Table 1. The laboratory analytical report is included in Appendix A.

OCPs and Arsenic

The following pesticides were detected above laboratory reporting limits in the shallow (0.0-0.5 foot) soil matrix samples: 4,4-Dichlorodiphenyldichloroethane (4,4-DDD), 4,4-Dichlorodiphenyldichloroethylene (4,4-DDE), and 4,4-Dichlorodiphenyltrichloroethane (4,4-DDT).

4,4-DDD - Concentrations ranged from below laboratory detection limits (non-detect) to 0.0013 milligrams per kilogram (mg/kg) in the sample collected from RB2 at 0.0-0.5 feet bgs.

4,4-DDE – Concentrations ranged from non-detect to 0.023 mg/kg in the sample collected from RB1 at 0.0-0.5 feet bgs.

4,4-DDT – Concentrations ranged from 0.00093 mg/kg to 0.014 mg/kg in the sample collected from RB1 at 0.0-0.5 feet bgs.

However, none of the concentrations detected were above the SFB RWQCB residential, commercial, and construction worker ESLs. No other pesticides were detected above the laboratory detection limits. Since the results of the shallow soil samples were below ESLs, the soil matrix samples collected from 2.5-3.0 feet bgs were not analyzed.

Arsenic – Concentrations of arsenic ranged from 2.9 mg/kg in the soil sample collected from RB3 at 0.0-0.5 feet bgs to 4.8 mg/kg in the soil sample collected from RB1 at 0.0-0.5 feet bgs. Although the levels of arsenic exceeded the residential, commercial, and construction worker exposure ESLs established for arsenic, the concentrations reported are within the accepted California background concentration range published by the Kearney Foundation (0.6 mg/kg to 11 mg/kg). It is typical for concentrations of arsenic to be above screening levels such as the ESLs. Therefore, based on the concentrations reported for arsenic in the shallow soil samples, no further assessment is recommended.

Conclusions and Recommendations

Based on the results of this Soil Assessment:

- Concentrations of OCPs in shallow soil were below both the residential, commercial, and construction worker exposure ESLs. Therefore, no further assessment of OCPs in onsite soil is recommended.
- Although arsenic was detected in the shallow soil at concentrations which exceeded ESLs, the concentrations reported were within the within the accepted California background concentration range published by the Kearney Foundation. Based on the concentrations reported for arsenic in the shallow soil samples, no further assessment is recommended.

Limitations

This Site Assessment Report has been prepared for and is intended for the exclusive use of Daylight Community Deveopment, LLC and Sunbelt Enterprises. The contents of this report should not be relied upon by any other party without the written consent of Rincon Consultants, Inc.

Our conclusions regarding the site are based on the results of the limited subsurface sampling and analysis. It should be noted that the concentrations of contaminants measured at any given location may not be representative of conditions at other locations. Further, conditions may change at any particular location as a function of time in response to natural conditions, chemical reactions and other events. Conclusions regarding the condition of the site do not represent a warranty that all areas within the site are similar to those sampled.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/26/2022 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

MGR DESIGN INTERNATI	1950 WILLIAMS DR.	WSW 1/8 - 1/4 (0.194 mi.)	N62	527

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
KAISER PERMANENTE OX EPA ID:: CAL000383641	2200 E GONZALES RD	S 1/8 - 1/4 (0.162 mi.)	J45	411

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/25/2022 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 10 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there are 29 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 06/10/2022 has revealed that there is 1 Notify 65 site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MANHOLE	3717 NYELAND AVE.	ENE 1/2 - 1 (0.940 mi.)	108	899

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 08/16/2022 has revealed that there is 1 CIWQS site within approximately 0.001 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
OUTLET CENTER	LOCKWOOD STREET	0 - 1/8 (0.000 mi.)	1	9

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 07/18/2022 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

MIXTURES.

Waste Code: F005

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P001

Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P046

Waste Description: ALPHA,ALPHA-DIMETHYLPHENETHYLAMINE (OR) BENZENEETHANAMINE, ALPHA, ALPHA-DIMETHYL-

Waste Code: P075

Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: P188

Waste Description: BENZOIC ACID, 2-HYDROXY-, COMPD. WITH (3AS-CIS)-1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYLPYRROLO[2,3-B]INDOL-5-YL METHYLCARBAMATE ESTER (1:1) (OR) PHYSOSTIGMINE SALICYLATE

Waste Code: P204

Waste Description: PHYSOSTIGMINE (OR) PYRROLO[2,3-B]INDOL-5-OL, 1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYL-METHYLCARBAMATE (ESTER), (3AS-CIS)-

Waste Code: U010

Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[[(AMINOCARBONYLOXY)METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-MET HOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C

Waste Code: U015

Waste Description: AZASERINE (OR) L-SERINE, DIAZOACETATE (ESTER)

Waste Code: U019

Waste Description: BENZENE (I,T)

Waste Code: U034

Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Waste Code: U035

Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U037

Waste Description: BENZENE, CHLORO- (OR) CHLOROBENZENE

Waste Code: U044

Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

1004677950

Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons:	0.4536
Year:	2017
Gepaid:	CAR000103333
TSD EPA ID:	CAD008364432
CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.328
Year:	2017
Gepaid:	CAR000103333
TSD EPA ID:	CAD008364432
CA Waste Code:	311 - Pharmaceutical waste
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.0005
Year:	2017
Gepaid:	CAR000103333
TSD EPA ID:	CAD008364432
CA Waste Code:	214 - Unspecified solvent mixture
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.117
Year:	2017
Gepaid:	CAR000103333
TSD EPA ID:	CAD008364432
CA Waste Code:	141 - Off-specification, aged or surplus inorganics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.002
Year:	2016
Gepaid:	CAR000103333
TSD EPA ID:	CAD008364432
CA Waste Code:	141 - Off-specification, aged or surplus inorganics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.022
Year:	2016
Gepaid:	CAR000103333
TSD EPA ID:	CAD008364432
CA Waste Code:	214 - Unspecified solvent mixture
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.0935
Year:	2016
Gepaid:	CAR000103333

Violation Date: 09-24-2013
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description: Failure of sensor to be located in the proper position/location.
Violation Notes: Returned to compliance on 09/24/2013. 87-B Fill Sump Sensor found on its side at the bottom of the sump. Alarm history and maintenance records show sensor alarmed on May 25, 2013 and replaced on May 26, 2013. Maintain sensor at earliest level of detection.
Violation Division: Oxnard City CUPA
Violation Program: UST
Violation Source: CERS,

Site ID: 108289
Site Name: Costco Wholesale #420
Violation Date: 08-14-2018
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).
Violation Notes: Returned to compliance on 08/14/2018. Tank #3 91 fill sump was accumulating liquid but not enough to trigger alarm.
Violation Division: Oxnard City CUPA
Violation Program: UST
Violation Source: CERS,

Site ID: 108289

Violation Date: 05-10-2018
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)

Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.

Violation Notes: Returned to compliance on 05/10/2018. Observed cord to Veeder Root Sensor 208 tangled up in Dispenser 3/4 making it raised from the bottom of the UDC approximately 1/4 of an inch inside a sleeve. Reviewed maintenance records and Dispenser had ISD work conducted in April and May 2018. Last alarm according to Veeder Root Panel was August 2017 during annual monitor certification test. UDS appeared to be dry and dusty. This is a Class II violation. Ensure all monitoring sensors are positioned at the lowest point of detection.

Violation Date: 09-24-2014
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 09/24/2014. Overfill alarm light did not light up when atg was at 90%. Repair/Replace light bulb.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 103242
Site Name: CarMax #6014
Violation Date: 09-17-2015
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 10/28/2015. Waste paint label was not visible and the other is missing accumulation date. Provide accumulation date to hazardous waste labels and maintain visible.
Violation Division: Oxnard City CUPA
Violation Program: HW
Violation Source: CERS,

Site ID: 103242
Site Name: CarMax #6014
Violation Date: 08-28-2018
Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)
Violation Description: Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the UPA, for the life of the UST.
Violation Notes: Returned to compliance on 09/26/2018. Monitor panel shoes alarms at the Annular Sensor on August 10, 2018 and twice on July 21, 2018. 2017 and 2018 maintenance records are not available. Look through records and/or contact maintenance company(s) to obtain 2017 and 2018 maintenance records.

Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194

Violation Description: Failure to comply with general tank operating requirements: (a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank , its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail;. (b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: (1) spill prevention controls (e.g., check valves, dry discount couplings); (2) overflow prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and (3) maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., standby tank with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank).

Violation Date: 05-16-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 06/19/2018. Observed outside by Form Oil dispensing area, a blue 55 gallon metal drum with hazardous waste label from Chaparral at 5625 Vineyard Ave, Oxnard, CA without an accumulation date. Label also states its concrete release. Per Diaz drum has been there for over a year. Hazardous waste is to be removed at least once a year. Contact hazardous waste hauler to remove hazardous waste. Maintain a copy of manifest for at least 3 years.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

S124837432

Violation Date: 12-05-2019
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 01/30/2020. Failure to obtain a federal EPA ID number for RCRA HW (facility is currently using a state permanent ID number).
Violation Division: Oxnard City CUPA
Violation Program: HW
Violation Source: CERS,

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-05-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Fire Code violation also noted during inspection.
Eval Division: Oxnard City CUPA
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-11-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Not reported
Eval Division: Oxnard City CUPA
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-30-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Verified violations from report dated 12/5/2019 have been corrected. - Facility has paid for Oxnard Fire/CUPA Permit and submitted to CERS. - Per Annor and Dept Admin Gabriel De-Souza, the P-listed waste is going to be monitored to ensure not to accumulate at or above 2.2 pounds. This will make this facility a CESQG. Pick-ups are being scheduled monthly. - Most recent pick-up from Clean Harbors shows no P-Listed waste onsite during inspection. - Review with employees how to document accumulation log @ the pharmacy.
Eval Division: Oxnard City CUPA
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-05-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: From 2017-October 2019, facility only became a RCRA LQG when they disposed of nicotine/warfarin waste.
Eval Division: Oxnard City CUPA
Eval Program: HWLQG
Eval Source: CERS,

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Evaluation Action Summary:

Evaluation Date: 19940505
Evaluation Responsible Agency: State Contractor/Grantee
Found Violation: Yes
Evaluation Type Description: COMPLIANCE EVALUATION INSPECTION ON-SITE
Evaluation Responsible Person Identifier: R9STA
Evaluation Responsible Sub-Organization: Not reported
Actual Return to Compliance Date: 19990505
Scheduled Compliance Date: Not reported
Date of Request: Not reported
Date Response Received: Not reported
Request Agency: Not reported
Former Citation: Not reported

Violation Notes: Returned to compliance on 05/02/2018. Failure to generate hazardous waste with a Permit from Oxnard Fire/CUPA. Facility has generated five gallons of x-ray solution waste from older x-ray machine. The x-ray class has gone to digital technology and will no longer generate x-ray solution waste. Disposal records onsite from previous generation. Contact x-ray solution hauler to remove within 30 days or obtain a Hazardous Waste Generator Permit by registering on the Statewide database California Environmental Reporting System (CERS). CERS Brochure provided. Contact Oxnard Fire/CUPA for re-inspection.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order
should cause a relatively minor impairment of beneficial uses compared
to a major or minor threat. Not: All nurds without a TTWQ will be
considered a minor threat to water quality unless coded at a higher
Level. A Zero (0) may be used to code those NURDS that are found to
represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as
cooling water dischargers or those who must comply through best
management practices, facilities with passive waste treatment and
disposal systems, such as septic systems with subsurface disposal, or
dischargers having waste storage systems with land disposal such as
dairy waste ponds.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Details of Off-site Transfers:

Cas number:	N150
Document control number:	1318217063371
Chemical name:	DIOXIN AND DIOXIN-LIKE COMPOUNDS
Classification:	DIOXIN
Offsite RCRA id nr:	NA
Offsite transfer sequence number:	2
Offsite name:	AGROMIN HORTICULTURAL PRODUCTS (VIA VEOLIA)
Offsite street address:	201 KINETIC DRIVE
Offsite City,State,Zip:	OXNARD, CA 93030
Offsite county:	VENTURA
Offsite province:	Not reported
Offsite country id:	Not reported
Offsite control:	NO
Unit of measure:	Grams
Offsite TRF to WST broker for DSP m94 LBS:	.013
Offsite TRF to WST broker for DSP m94 BOE:	Other
Total amount transferred offsite for disposal:	.013
Total amount transferred offsite for recycling:	0

Details of Transfers to Publicly Owned Treatment Works:

Cas number: N150
Document control number: 1318217063371
Chemical name: DIOXIN AND DIOXIN-LIKE COMPOUNDS
Classification: DIOXIN
Unit of measure: Grams
POTW name: CITY OF OXNARD WASTEWATER TREATMENT PLANT
POTW address: 6001 PERKINS RD
POTW City,State,Zip: OXNARD, CA 93033
POTW county: VENTURA
Quantity transferred: .00093
Basis of estimate: Not reported
Discharges to water streams: 0
Discharges to water streams - basis of estimate: Not reported
Discharges to other activities: 0
Discharges to other activities - basis of estimate: Not reported
Released to air: 0
Released to air - basis of estimate: Not reported
Sludge to disposal: 0
Sludge to disposal - basis of estimate: Not reported
Sludge to incineration - metals: 0
Sludge to incineration - metals - basis of estimate: Not reported
Sludge to agricultural applications: 0
Sludge to agricultural applications - basis of estimate: Not reported
Other or unknown disposal: 0
Other or unknown disposal - basis of estimate: Not reported
Other or unknown treatment: .00093
Other or unknown treatment - basis of estimate: Other
Sludge to incineration - nonmetals: 0
Sludge to incineration - nonmetals - basis of estimate: Not reported
Total treated: .00093
POTW Registry ID: Not reported
Off Site - POTW Releases 81C: 0
Off Site - POTW Releases 81D: 0
Off Site - POTW Releases: 0
Experimental and Est. Treatment: 0
Experimental and Est. Treatment - Basis of Est.: Not reported

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR PROGRAM

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

OSHA ESTABLISHMENT

HAZARDOUS AIR POLLUTANT MAJOR

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

AIR MAJOR

HAZARDOUS WASTE BIENNIAL REPORTER

US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

Violation Division: Cal/OSHA
Violation Program: OSHA
Violation Source: CERS,

Site ID: 403966
Site Name: THE PROCTER & GAMBLE PAPER PRODUCTS CO
Violation Date: 03-15-2017
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22,
Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Description: Failure of generator to obtain assessment or reassessment every five
(5) years or the remaining service life of the tank system, as stated
in the engineer's assessment, whichever is less. This assessment
applies to onground or aboveground tank systems containing only
non-RCRA hazardous wastes generated onsite, and tank systems
authorized under Permit-by-Rule, Conditional Authorization, and
Conditional Exemption or for a small quantity generator onground or
aboveground tank systems containing RCRA hazardous wastes generated
onsite.
Violation Notes: Ancillary equipment for hazardous waste tank not tested (waste
emulsion tank). Secondary containment area for tank is questionable.
Facility has scheduled a P.E. assessment (tank, ancillary equipment, &
secondary containment)for 3/30/17.

SIC Code: 5093
SIC Code 2: Not reported
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste: STORMS
Waste Type2: Not reported
Waste2: Stormwater Runoff
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-25-2019
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: During the inspection, Staff verified that measures indicated in the Level 1 ERA report were implemented. Staff verified that personnel were trained and that monitoring, and inspections, were conducted for the facility. Staff mentioned the discoloration on the pavement and was informed that since materials are dropped off by individuals, there is often discolored water coming off items or vehicles. Mr. Morales informed Staff that a second filtration unit is planned to be installed for additional treatment of stormwater prior to leaving the premises. Facility was in compliance at the time of the inspection and no issues were identified. Facility is to continue to monitor exceedances and evaluate how to reduce elevated levels identified through sampling data.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/26/2022	Source: EPA
Date Data Arrived at EDR: 08/02/2022	Telephone: N/A
Date Made Active in Reports: 08/22/2022	Last EDR Contact: 10/05/2022
Number of Days to Update: 20	Next Scheduled EDR Contact: 01/09/2023
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022	Source: EPA

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/26/2022

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/26/2022

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Elevation:	81 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	11998320 OXNARD, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

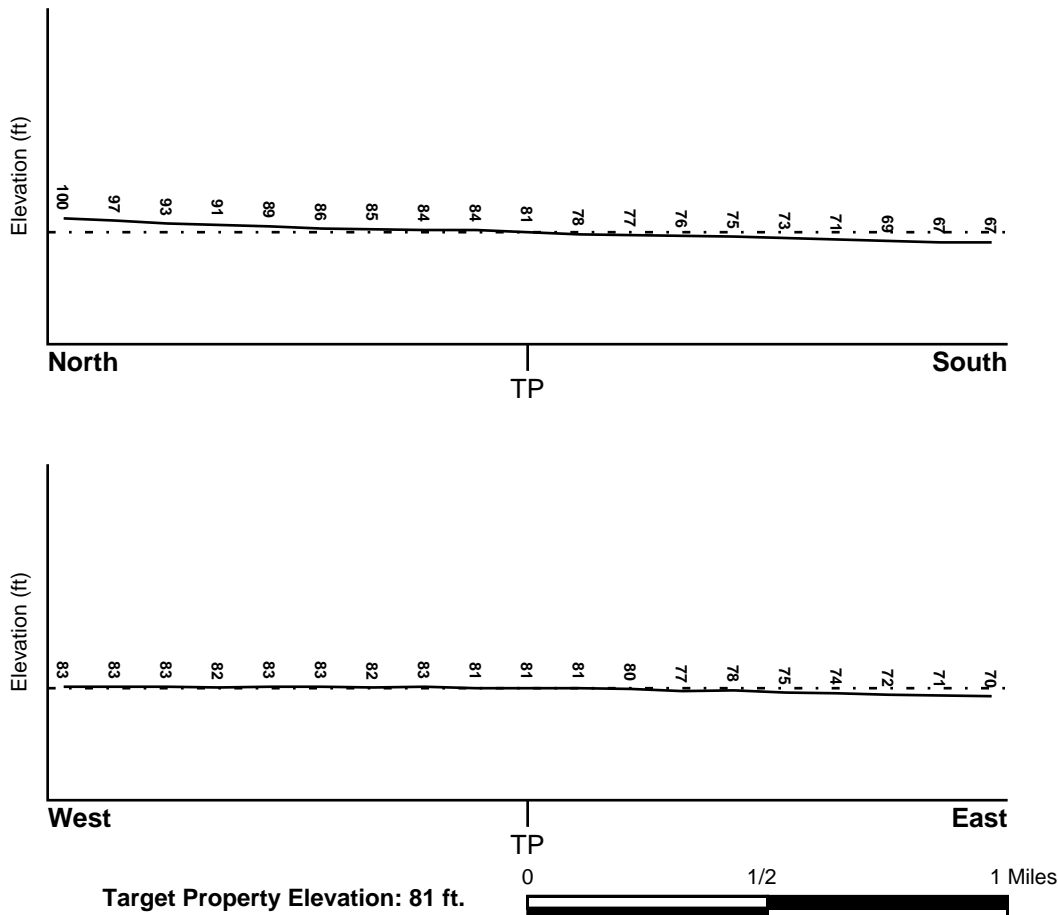

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CAMARILLO

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	24 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	24 inches	50 inches	stratified sandy loam to sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
3	50 inches	79 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: HUENEME

Soil Surface Texture: loamy sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	16 inches	59 inches	stratified sandy loam to silt loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4

Soil Map ID: 3

Soil Component Name: PICO

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9
2	14 inches	53 inches	stratified sandy loam to loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9
3	53 inches	59 inches	stratified gravelly sand to gravelly loamy coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9

Soil Map ID: 4

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United States Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Rincon were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Rincon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1926 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1926 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.
