

Below is the weekly remote sensor data from 5/17/23 to 5/24/23. Dissolved oxygen (DO; in blue) and chlorophyll concentrations (a proxy for microscopic algal biomass, in green) were acceptable at both stations with normal daily oscillations observed. Spike of chlorophyll concentrations (> 40 µg/L) observed at station 7 is likely artifactual. Chlorophyll concentration > 100 µg/L was removed as it was also likely artifactual (gap in chlorophyll data at station 6 on 5/19/2023).

The City of Oxnard and Aquatic Bioassay & Consulting will continue to monitor the sensors in the area.

Logger 062554 – Located at Seabridge (Station 6)

Logger 062556 – Located at Westport (Station 7)
