## TOPIC: California's Updated Fire Hazard Severity Zone Maps

The State Fire Marshal evaluates the severity of fire hazards for both the state and local jurisdictions. The fire hazard severity zone maps were last updated in 2007.

With updated maps set to be released late March 2025, hazard severity zone changes could be applied to the beach communities.

The City will host a District 1 Town Hall to provide more information and address questions, featuring staff from the Fire Department, Community Development, and City Manager's Office to discuss the updated maps and explain the technical terms used by the State in this process.
